Subject Index to Volume 24

Abdomen, static volume-pressure characteristics, 544
Abdominal muscles, ventilatory mechanics, during exercise, 159
Abdominal wall, mechanoelectric motion transducer, 430
Acclimatization: *see* specific condition
Acetazolamide
  arterial blood gases, 17
  carbonic anhydrase inhibition, 17
  CSF bicarbonate, 17
  CSF lactate, 17
Acid-base states
  blood gas temperature coefficients, 225
  head-perfusion study, rat, 407
  quantitative displacement in respiratory acidosis, 288
Acid loading, fetal and newborn sheep, 135
Acidosis, metabolic
  fetal and neonatal sheep, 135
  pulmonary vasoconstriction, 491
Acidosis, respiratory
  acid-base equilibrium, 268
  myocardial potassium, 498
  pulmonary vascular effects, bovine, 355
  pulmonary vasoconstriction, 491
  renal compensation, 288
  ventilation, at altitude, 607
Action potentials: *see* Potentials
Activity rhythms: *see* Rhythms
Adrenergic receptor stimulation, pulmonary vascular effects, bovine, 355
Aerobic capacity
  altitude, 685, 792
  maximum, and running performance, at altitude, 685
  3-methoxy-4-hydroxymandelic acid, 619
  physical exercise, 619
Age
  airways conductance, 310
  alveolar collapse, 49
Aging
  chest compliance, 741
  cold resistance after X-irradiation, 768
  functional residual capacity, 49
  lung volume, artificial microhole study, 83
  maximum oxygen intake, 700
  respiratory pattern, 49
  sperm production, goat, 369
  tidal volume, 49
  ventilation uniformity, 49
Air, end-tidal, water vapor pressure of, 229
Air lock, for feeding, in small environmental chamber, 834
Airway
  obstruction, effects on airway conductance in working men, 310
  pressure, regulation, in respiratory gas sampling, 113
  resistance: *see* Resistance
Airway conductance
  age, 310
  body height, 310
  body surface area, 310
  bronchitis, 310
  effects of airway obstruction, 310
  FEV, 310
  in working men, 310
  smoking, 310
  volume standardization, 310
Airway morphology, 373, 384
  airways resistance and, 384
  bronchial anatomy, 373, 384
  bronchial tree, 373, 384
  functional consequences, 384
  gas diffusion, 384
  gas flow, 373, 384
  gas, inspired, 384
  respiratory dead space, 384
Albumin
  ^{131}I-labeled, cerebral blood volume studies, 79
  serum, during heat exposure, 302
Alkalosis, metabolic
  cerebral blood flow, 60
  cerebral carbohydrate metabolism, 66
Alkalosis, respiratory
  cerebral blood flow, 60
  cerebral carbohydrate metabolism, 66
  ventilation, at altitude, 607
Allometric equation, energy metabolism, 11
Alpaca, erythrokinetics, 93
Altitude
  aerobic capacity, 685, 792
  blood volume, 203
  carbon dioxide, effects on ventilation, 607
  heart rate, 792
  hematology, 203
  myeloid/erythroid ratio, 203
  oxygen intake, maximal, 792
  oxygen transport, 203
  reticulocytes, 203
  running performance, 685
  ventilation, 607, 685, 792
  work capacity, natives, 792
Altitude acclimatization, adaptation
  arterial saturation, 93
  blood volume, 93
  bone marrow histology, 93
  CSF bicarbonate, 17
  erythrokinetics, 93
  erythropoietin secretion, 93
  exercise, 792
  iron metabolism, 93
  red blood cell life span, 93
  work capacity, 792
Altitude tolerance
  fatigue, 733
  reversible physiologic disability as a criterion, 733
  tests, 733
  work, 733
Alveolar-arterial oxygen gradient: *see* Oxygen
Alveolar-dilution ratio, inspired gas distribution, 129
Alveolar wall microhole studies
  aging, 83
  atelectasis, 83
  emphysema, 83
  lung elasticity, 83
  lung regeneration, 83
  lung surface tension, 83
  lung volume effects, 83
Alveoli
  bubble-stability study of lung alveolar surfactant, 510
  collapse, in aging, 49
  gases: *see* Gas, or the spceific gas
  pressure, mean, on inhomogeneous lung, 761
  ventilation: *see* Ventilation
Amplifier, transistorized, high-current, long-pulse, for massive stimulation of skeletal muscle, 503
Analog computer: *see* Computer
Analog recorder, for heart rate, 585
Angiocardiography, serial biplane, of cardiac mechanical parameters, 254
Angiography, video: *see* Videoangiography
Animals
  high-altitude-adapted, erythrokinetics, 93
  maintenance, under pressure, 834
Anoxia, and metabolic depression, in diving turtle, 503
Antipyrine-^{131}I, coronary flow measurement, 446
Aorta
  blood pressure and velocity, as function of time and position, 563
  diameter, catheter-tip gauge for, 259
Aortic nerve activity, quantatitive analysis, 416
Argon, and hypoxia tolerance, 778
Arterial blood gases: *see* Gas
Arterial occluder, renal, 838
Arterial pressure, systemic
  hypoxia, 755
  magnesium chloride, 755
Arterial tree
  phase velocity, 73
  regional pulse-wave velocity, 73
  wave-front velocity, 73
Arterial saturation, in high-altitude-adapted animals, 93
Asphyxia, oxygen stores in, 809
Astronauts, catacholamine metabolism, 146
Atelectasis, and lung volume, alveolar microhole study, 83
Atmosphere, artificial, chick embryogenesis in, 330
Atria: *see* Heart atria
Autoradiography, whole-body, of urea-^{14}C distribution in pregnancy, 828

Backpack, for free-ranging primates, 252
Bailey bottle, modification, 412
Balloon technique, for myocardial blood flow determination, 840
Baroceptor, carotid sinus: *see* Carotid sinus baroceptor

Bats, erythrocyte flux, photocell-computer detection, 728
Bicarbonate, cerebrospinal fluid
  acetazolamide effects, 17
  hypoxia effects, 17
Biological support, for isolated lung preparation, 600
Biopsy drill permitting rapid freezing, 832
Blast injury, mechanoelectric motion transducer, 430
Blood: *see also* specific anatomical location
  acid-base status, effect on temperature coefficients for P_{CO_2} and P_{O_2}, 225
  constituents, variations during heat exposure, 302
  gases: *see* Gas, or the specific gas
  sampling, alveolar-arterial gradients for oxygen, 324
  stored, oxygen consumption, 324
Blood flow
  arterial occluder, 838
  catheter-tip gauge, 259
  regional, hepatic-splanchnic metabolism, 475
  salivary duct pressure, 653
  splanchnic, in exercise and heat stress, 475
  thermistor velocity probe, linear, 236
  venous, phasic variations, plethysmographic measurement, 124
Blood pressure
  exercise after training, 518
  heat stress, 475
  tape-recorded, 115
  warm environment, pig, 33
Blood vessels
  critical closure, 625
  diameter, catheter-tip gauge, 259
Blood volume
  altitude, 93, 203
  exercise, 622
Body composition, during exercise, 622
Body height, affect on airways conductance, 310
Body size, during spontaneous muscular activity, 11
Body surface area, affect on airways conductance, 310
Body weight
  and cold resistance after X-irradiation, 768
  evaporative loss, during heat exposure, 320
  exercise, 485
  in cold, 282
Bohr effect, in cerebral carbohydrate metabolism, 66
Bone marrow
  high-altitude-adapted animals, 93
  oxygen consumption, 751
  response to oxygen partial pressure, 751
Bovines, pulmonary vasculature, hypoxic adrenergic effects, 355
Bradycardia
  cooled man, 177
  diving, in man, 773
  hyperbaric helium atmospheres, 678
Brain
  blood flow, 407
  carbon dioxide, head-perfusion study, 407
  glucose phosphate-^{14}C dephosphorylation, 817
  metabolism, head-perfusion technique for study of, 407
  T-1824, distribution, head-perfusion study, 407
Brain stem activity, rabbit
  pyrogens, effects, 645
  single-unit, 645
  temperature effects, 645
Breath-hold diving, exercise: *see* Diving, and Exercise
Breathing mechanics
  abdominal muscles, 159, 544
  chest compliance, 741
  chest wall, 159
  diaphragm activity, 741
  inhomogeneous lung, 761
  lung tissue resistance, 296
  pulmonary hysteresis, 296
  rib cage, 159, 544
  static volume-pressure characteristics of rib cage and abdomen, 544
  volume-pressure curves, in vivo and in vitro, comparison, 348
Breathing patterns
  chest wall mechanics, 159
  during exercise, 159
Breathing rate
  hypoxia tolerance and, 778
  inert gases, 778
Bronchial anatomy, 373, 384
Bronchial artery collaterals, and pulmonary wedge pressure, calf, 640
Bronchial tree
  branching patters, 373
  morphology, 373, 384
Bronchitis
  airways conductance during, 310
  and-tidal air, water vapor pressure of, 229
  total chest compliance, 741
Bubble-stability, alveolar, in study of lung alveolar surfactant, 510
Bunsen solubility coefficient, 468

Calf, pulmonary wedge pressure, lability of, 640
Calorimetry
  human limb, 277
  metabolic depression, diving turtle, 503
  oxygen depletion, diving turtle, 503
Cannula, intravascular
  capping and stabilizing, 577
  elevated skull platform for, 577
Cannulation, internal jugular, in measurement of cardiac output, 434
Capillaries, erythrocyte detection, photocell-computer technique, 728
Carbohydrate metabolism, cerebral, in alkalosis, 66
Carbon dioxide
  determination, gas-transferring device for Haldane apparatus, 455
  inhaled, Servo control, 414
  pressure, alveolar and arterial, lung model, mathematical analysis, 549
  rebreathing method, and Fick method, comparisons for determining cardiac output, 424
  uptake, brain, head-perfusion study, 407
  ventilatory acclimatization to altitude, 607
Carbon dioxide production
  breath-hold diving, 190, 773
  breath-hold exercise in air and water, 773
Carbon dioxide stores
  asphyxia, 809
  ventilation and, 809
Carbon dioxide tension
  acid-base status, 225
  breath-hold diving, 182
  direct Fick method, 424
  rebreathing method, 424
  temperature coefficients, 225
Carbon dioxide tension, alveolar
  breath-hold diving, 190
  breath-hold exercise in air and water, 773
  change with mechanical dead space, 556
  during artificial ventilation, 556
Carbon monoxide diffusion, 468, 692
Carbon monoxide solubility
  blood, 468
  hemoglobin, 468
  placental tissue, 468
  pulmonary tissue, 468
Carbon, radioactive: *see also* specific labeled substance
  intrarenal distribution of diffusable substances, 106
Carbonic anhydrase inhibition, cerebrospinal fluid, 17
Cardiac output
  at rest, methods for determining, 424
  carbon dioxide-rebreathing method, 424
  direct Fick methods, 424
  dye injector, in measurement of 451
  hypoxic pulmonary vasoconstriction, 755
  inspired O_2 during exercise, 336
  internal jugular cannulation, in measurement of, 434
  magnesium chloride, 755
  precordial-to-arterial clearance ratios, 464
  serial biplane angiocardiogram, 254
  thermal dilution, in measurement of, 434
  thermistor velocity probe, linear, 236
  warm environment, pig, 33
Cardiac pacemaker, variable-frequency, 580
Cardiopulmonary response
  exercise, 336
  inspired O_2, 336
Cardiorespiratory function, college-age males, 459
Cardiorespiratory response
  maximal, variability, 459
  to exercise, 459
Cardiovascular studies, dye injector for, 451
Carotid sinus baroceptor
  electrical activity, demodulation of, 262
  servo-controlled pressure generator, 232
  transfer function, 262
Catecholamines
  excretion, during physical exercise, 619
  hypoxic pulmonary hypertension, bovine, 355

metabolism, in astronauts, 146
sleep deprivation, 167
Catheter-tip gauge, 259
Catheter-tip velocity probe, 236
Catheterization, arterial, for chaired laboratory primates, 109
Central nervous system
cold acclimatization, 177
habituation, 177
Cerebrospinal fluid
bicarbonate, effects of acetazolamide and hypoxia, 17
carbonic anhydrase inhibition, 17
lactate, effects of acetazolamide and hypoxia, 17
Cerebrovascular resistance, in alkalosis, 60, 66
Cerebrum
blood flow, in alkalosis, 60, 66
blood volume, isotope studies, 79
carbohydrate metabolism, in alkalosis, 60, 66
hematocrit, isotope studies, 79
metabolic alkalosis, 60, 66
respiratory alkalosis, 60, 66
Chamber, environmental, pressurized, feeding air lock for, 834
Chest wall
chronic obstructive lung disease, 741
compliance, 741
diaphragm activity and, 741
elasticity, 544
electromyography, 741
exercise, 159
mechanoelectric motion transducer, 430
ventilatory mechanics, 159
Chick embryogenesis: *see* Embryogenesis
Chicken, circadian oscillations, effect of light and color, 401
Chromatography, gas: *see* Gas analysis
Chromium-51, in cerebral red cell isotope studies, 79
Circadian rhythms: *see* Rhythms
Circulation
dye injector studies, 451
exercise and training, 518
heat uptake and dermal conductance in limbs, 277
mechanical, extracorporeal, 406
lung: *see* Lung circulation; Pulmonary circulation
peripheral tissue, in cold acclimatization, 177
Circulatory occlusion
isometric contraction, 54
muscular fatigue, 54
Clearance half-times, coronary flow index, 464
Clearance time constant, nitrogen washout, 668
Closed systems, chick embryogenesis, 330
Clothing, effects on solar heat load, 717
Code searcher: *see* Computer
Cold
lethality of, and X-irradiation, 768
resistance to, radiation-induced, 768
Cold acclimatization
central nervous system, habituation, 177
circulation, peripheral tissue, 177
induced, 177
metabolism, 177
scuba diving, 177
Cold exposure
and sleep deprivation, physiological effects, 167
body weight, 282
heat conductance changes, 282
lactic dehydrogenase isozymes, 616
metabolic reactions, 282
plasma enzymes, 616
skin temperature changes, 282
temperature reactions, 282
thermal insulation, 282
Colloid, plasma, osmotic pressure, continuous recording osmometer for, 602
Colonic temperature, during exercise, 741
Color, effect on circadian oscillations, chicken, 401
Computer
analog, inspired gas distribution, 129
analog tape, 711
angiocardiography, serial biplane, 254
cardiac contractility, 419
cardiac mechanical parameters, 254
code searcher, 711
coronary flow index, 464
data reduction, on-line digital integrator for, 593
digital coder, 711
digital integrator, on-line, 593
event marker, 711
precordial to arterial clearance ratios, 464
real-time clocking and data identification, 711
time code generator, 711
video image analysis, heart, 724
visual image analysis, erythrocyte flux, 724
Conductance
airway: *see* Airway conductance
dermal, in heated forearm and hand, 277
Constant-flow valve, for respiratory gas sampling, 113
Contraction, contractility, muscular: *see* Muscle
Convertor, for instant heart rate monitor, 585
Cooling
lung, 707
organ, in vivo, 707
vagal, effect on ventricular output, 782
Coronary arteries and collateral arteries, in exercise, 485
Coronary blood flow, xenon-133 in measurement of, 446
Coronary flow index
clearance half-times, 464
precordial-to-arterial clearance ratios, 464
Crash research, mechanoelectric motion transducer, 430
Creatine phosphate, heart concentration, in rapidly frozen biopsy sample, 832
Critical closing pressure
pulmonary vessels, 625
Starling resistor model, 625

Damping, mechanoelectric transducer, 430
Data processing: *see* Computer
Dead space
alveolar carbon dioxide tension, 556
respiratory, airway morphology, 384
ventilation-perfusion ratios during vasoconstriction, 491
Dead space, physiological
alveolar carbon dioxide tension, 556
in lung model, mathematical analysis, 549
shunt, effects, 549
Deformation
mechanoelectric transducer, 430
static volume-pressure characteristics of rib cage and abdomen, 544
Dehydration, and physical endurance, 636
Denervation, cardiac nerves, without immediate thoracotomy, technique, 269
Densitometry, video: *see* Videodensitometry
Diabetes insipidus, effect on uterine and milk-ejecting activities during labor, 317
Diaphragm activity
and total chest compliance, 741
electromyography, 741
mechanoelectric motion transducer, 430
Differential voltage comparator, 736
Diffusing capacity
membrane, 468
oxygen, 468
placental, 787
Diffusing capacity, carbon monoxide
membrane, 468
pulmonary vascular pressure and, 692
single-breath, 692
Diffusing capacity, pulmonary
oxygen toxicity, 537
physical training and, 152
submaximal work, 152
Diffusion barrier, epidermal, to xenon-133, 211
Diffusion, gas, airway morphology, 373, 384
Digital integrator: *see* Computer
Diode, four-layer, in compact stimulator, 249
Direct Fick method, for determining cardiac output, 424, 434
Diving
body temperature and metabolism, 678
bradycardia, in man, 773
metabolic depletion, turtle, 503
oxygen depletion, turtle, 503
reflexes, man, 773
scuba, cold acclimatization, induced, 177
Diving, breath-hold, 182, 190, 773
alveolar gases, 182, 190
carbon dioxide, 182, 190
lactic acid, blood, 190
man's responses, 773
oxygen, 182, 190
pulmonary gases, 182, 190
Dye-dilution curves
coronary flow index, 464
precordial-to-arterial clearance ratios, 464
Dye injector, for cardiovascular studies, 451

Edema, pulmonary, and wedge pressure, calf, 640
Electric potentials: *see* Potentials
Electrodardiogram
  during exercise, spray-on electrode for, 267
  radiotelemetry system, 588
  telemetry, horse, 98
Electrode
  impedance, during exercise, 267
  implantation, small animals, 573
  oxygen, in determining alveolar-arterial oxygen gradients, 324
  silicone rubber, for small animals, 573
  spray-on, for recording electrocardiogram during exercise, 267
Electroejaculation method, for semen analysis, 369
Electromyography
  circulatory occlusion and muscular fatigue, 54
  diaphragm activity and chest compliance, 741
Electrophoresis, proteins, in study of heat exposure effects, 302
Embryogenesis, chick
  artificial atmosphere, 330
  environmental factors, 330
  helium effects, 330
  inert gases, 330
Emphysema, pulmonary
  alveolar wall microhole studies, 83
  lung volume changes, 83
  total chest compliance, 741
End-tidal air, water vapor pressure of, 229
Endurance: *see* Physical endurance
Energy metabolism
  allometric equation, 11
  exercise effects, 336
  inspired O_2 effects, 336
  spontaneous muscular activity, 11
Environment: *see* specific environmental condition; and Temperature, environmental
  sealed, for chick embryogenesis, 330
Environmental chamber, feeding air lock for, 834
Environmental factors, in embryonic development, chick, 330
Enzymes, plasma, in cold exposure, 616
Epidermal cells, removal by stripping, 211
Epidermal diffusion barrier, xenon-133, 211
Equivalent pore radius, intestinal mucosa, 40
Erythrocytes
  ^{51}Cr-labeled, cerebral blood volume studies, 79
  detection, photocell-computer technique, 728
  life span, in high-altitude-adapted animals, 93
Erythrokinetics, in high-altitude-adapted animals, 93
Erythropoietin secretion, in high-altitude-adapted animals, 93
Esophageal pressure
  as a measure of pleural pressure, 348
  oxygen toxicity and, 529
Exercise: *see also* Work; Physical endurance, training
  abdomen, role in ventilation, 159
  adaptations to, 622
  at altitude: *see* Altitude
  blood lactate, 336
  blood volume, 622
  body composition, 622
  body weight, 485
  breath-hold, man's responses in air and water, 773
  capillary-ventricular muscle fiber ratios, 485
  cardiac hypertrophy, 485
  cardiac output, 336
  cardiac responses, 98, 485
  cardiopulmonary responses, 336
  cardiorespiratory responses, 459
  catecholamine excretion, 619
  chest wall mechanics, 159
  circulatory occlusion, 54
  circulatory response, effect of training, 518
  colonic temperature response, 747
  coronary arteries, 485
  coronary collateral arteries, 485
  diving: *see* Diving
  electrocardiogram, electrode recording, 267
  fatigue: *see* Fatigue
  hemoglobin, total body, 622
  hepatic-splanchnic metabolism, 475
  hypoxia, 336
  ischemic, muscle pain in, 142
  metabolic response, 336
  3-methoxy-4-hydroxymandelic acid excretion, 619
  muscle elasticity, 21
  oxygen, inspired, effects, 336
  physical training: *see* Physical training
  physiology, 619
  prolonged, 622
  respiration, effects of inspired O_2, 336
  rib cage, role in ventilation, 159
  spontaneous muscular activity, 11
  submaximal, heart rate response, horse, 98
  tolerance. *see* Physical endurance
  venous hematocrit, 622
  ventilation during, 159
Exhaustion: *see* Fatigue; Work, exhausting

Fatigue
  and altitude tolerance, 733
  muscular, circulatory occlusion, 54
Fatty acids, free
  heat stress, 475
  metabolism, 475
Feeding air lock, for small environmental chamber, 834
Femoral artery, superficial, for chaired laboratory primates, 109
Fetal physiology, acid loading, in sheep, 135
FEV, affect on airways conductance, 310
Fever, and brain stem activity, rabbit, 645
Fibrinolysin, in arterial catheterization of chaired laboratory primates, 109
Fick methods, for determining cardiac output, 424, 434
Filtration coefficient, intestinal mucosa, 40
Flow regulator, for respiratory gas sampling, 113
Flowmeter, catheter-tip, 259
Forearm, heat uptake, 277
Free fatty acids: *see* Fatty acids, free
Freeze-drying, and intrarenal distribution of diffusable substances, 106
Freezing, rapid, biopsy drill for, 832
Frog, stretched muscle, positive work done by, 21

Gas analysis
  analyzer with modified Bailey bottle, 41
  chromatographic, recirculation system, 119
  constant-flow valve for respiratory sampling, 113
  gas-transferring device for Haldane apparatus, 455
  sampling system, 119
Gas, blood
  acetazolamide, 17
  arterial, 17
  hypoxia, 17
  warm environment, pig, 33
Gas diffusion: *see* Diffusion; Diffusing capacity
Gas distribution
  inhomogeneous lung, 761
  inspired, 129
Gas exchange
  alveolar, in breath-hold diving, 182, 190
  pulmonary, in breath-hold exercise in air and water, 182, 190, 773
Gas flow
  airway morphology, 373, 384
  bronchial tree, 373
  inspiratory, regulation, 129
Gas, inert
  arterial oxygen in hypoxia, 778
  atraumatic local labeling of skin, 570
  barrier, in skin, 211
  body temperature in hypoxia, 778
  chick embryogenesis, 330
  clearance, by sweat, 211
  hypoxia tolerance, 778
Gas, inspired
  airway morphology, 384
  distribution, 129
Gas tension
  alveolar, breath-hold, 190, 773
  blood, temperature coefficients, 225
Gauge, catheter-tip
  blood flow velocity, 259
  blood vessel diameter, 259
Generator, ramp, for producing continuously advancing pulses, 272
Globulins, serum, during heat exposure, 302
Glomerular filtration rate, Macaca speciosa, 366
Glucose
  brain, phosphorolysis, 817
  metabolism, in heat stress, 475
  pulmonary vasoconstriction, calf, 640
  requirement, after hepatectomy, 722
Glucose phosphate-^{14}C, dephosphorylation across brain, 817
Goat
  semen analysis, 369
  sperm production, effects of age, 369

Hand, heat uptake, 277
Head, blood flow, rat, 407

Head-perfusion technique, brain metabolic studies, rat, 407
Headstand posture, respiratory responses, 697
Heart
  biopsy drill permitting rapid freezing, 832
  creatine phosphate sample, in rapidly frozen biopsy sample, 832
  cycle duration, computer, 419
  denervation, without immediate thoracotomy, technique, 269
  dynamic shape measurement, 724
  electrocardiogram: *see* Electrocardiogram
  exercise, effects, 485, 518
  extrasystolic potentiation, roentgen videodensitometer study, 217
  filling, plethysmographic measurement, 124
  frequency measurements, maximum oxygen intake, 700
  hypertrophy, and exercise, 485
  mechanical parameters, serial biplane angiocardiography, 254
  metabolism, intermediary, 832
  mitral regurgitation, roentgen videodensitometry, 217
  mitral valve closure, during atrial fibrillation, roentgen videodensitometry, 217
  output: *see* Cardiac output
  size, and exercise, 485
  stimulation, roentgen videodensitometer study, 217
  systole, computer and, 419
  videoangiography, 724
Heart atria
  contraction, 217
  fibrillation, mitral valve closure during, 217
  roentgen videodensitometer study, 217
Heart muscle
  capillary-ventricular muscle fiber ratios, effect of exercise, 485
  contractility, computer, 419
  serial biplane angiocardiography, 254
Heart rate
  altitude, 792
  analog recorder, 585
  breath-hold exercise in air and water, 773
  electrode recording, during exercise, 267

  epicutaneous labeling by xenon-133, 570
  epidermal cells, removal by stripping, 211
  epidermal diffusion barrier, xenon-133, 211
  inert gas barrier, 211
  local labeling with inert gas isotopes, 570
Skin temperature
  cold exposure, 282
  hyperbaric helium atmosphere, 678
  physical endurance, 636
Sleep deprivation
  catecholamines, 167
  magnesium excretion, 167
  physiological responses, 167
  psychomotor performance, 167
  temperature regulation, 167
Smoking, effects on airways conductance, 310
Sodium
  metabolism, during hyperthermia, 1
  serum, during heat exposure, 302
  unidirectional flux, intestinal, 40
Sodium diatrizoate, renal clearance, monkey, 366
Solar heat load, prediction of, 717
Solubility coefficient, Bunsen, 468
Space flight, effects on catacholamine metabolism, 146
Spectrometry, mass, for determining water vapor pressure of end-tidal air, 229
Sperm production, effects of age, goat, 369
Spike-amplitude discrimination, pulse-height analyzer for, 736
Splanchnic blood flow
  exercise, 475
  heat stress, 475
Stability ratio, lung alveolar surfactant, 510
Starling resistor model, pulmonary critical closure, 625
Stimulator, compact, using integrated circuits and battery power, 249
Stress: *see* specific stressful condition
Stress relaxation, effect on lung tissue resistance and pulmonary hysteresis, 296
Stroke volume: *see* Heart, stroke volume
Substrates, renal response, respirometry, 102
Sulfur hexafluoride, and hypoxia tolerance, 778
Sweat
  rate, and rectal temperature, functional relationships, 800
  rates, thermoregulatory function test, 391
  suppression, thermoregulatory function test, 391
  xenon-133 clearance, 211
Sympathectomy, cardiac, without immediate thoracotomy, technique, 269
Sympathoadrenal system, catecholamine metabolism in astronauts, 146
Systemic arterial pressure: *see* Arterial pressure
Systemic resistance: *see* Resistance

T-1824, brain distribution, head-perfusion study, rat, 407
Tape recording, blood pressure, 115
Techniques: *see also* Instrumentation
  aortic nerve activity, quantitative analysis, 416
  balloon, for myocardial blood flow determination, 840
  blood gas analysis, Van Slyke-Neill, 119
  capping and stabilizing intravascular cannulae, 577
  carbon dioxide rebreathing for determining cardiac output, 424
  cardiac output measurement by thermal dilution, 434
  coronary flow measurement with ^{133}Xe, 446
  Fick method for determining cardiac output, 424
  head-perfusion, rat, 407
  hepatectomy, simplified two-stage, 722
  indicator-dilution, for cardiovascular studies, 451
  local labeling with gaseous isotopes, 570
  mechanical extracorporeal circulation, rat, 407
  nerve stimulation, small animals, 573
  peritoneal lavage in unrestrained animal, 836
  pressure gradient, 563
  solar heat load prediction, 717
  Van Slyke-Neill, for blood gas analysis, 119
  videoangiography, biplane, 722
Telemetry; Radiotelemetry
  backpack for free-ranging primates, 252
  electrocardiogram, 98, 588
  implantable unit for body temperature measurement, 439
  miniaturized, multichannel, personal system, 588
  oxygen consumption, 588
  temperature, 588
Temperature: *see also* the specific anatomi-

cal locations, and the specific temperature condition
Temperature, body
brain stem single-unit activity, rabbit, 645
circadian oscillations, in chicken, 401
coefficients, for blood gas tensions in bloods with varying acid-base status, 225
colonic, during exercise, 747
forearm and hand, heat uptake, 277
hyperbaric helium atmospheres, 678
hypoxia tolerance and, 778
intravascular, hepatic-splanchnic metabolism, 475
inert gases and, 778
metabolic depression, diving turtle, 503
multitemperature test, heat reactions, 800
physical endurance, 636
reactions in cold exposure, 282
rectal, and sweat rate, functional relationships, 800
rectal, and physical endurance, 636
skin: *see* Skin
sleep deprivation, 167
telemetry unit, implantable, for measurement of, 439
thermoregulatory function test, 391
transmitter, implanted, for measurement, 439
Temperature, environmental
hepatic-splanchnic metabolism, 475
radiotelemetry system, 588
warm: *see* Warm environment
Thermal dilution, in measurement of cardiac output, 434
Thermal insulation, in cold, 282
Thermistor velocity probe, linear, 236
Thermoregulatory function test
heat acclimatization, 391
sweat rates, 391
sweat suppression, 391
Thoracic duct shunt, technique, 247
Tidal volume
age differences, effect of respiratory pattern, 49
inspired gas distribution, 129
Tissue
homogenation, 468
peripheral circulation, in cold, 177
samples, rapid freezing, biopsy drill for, 832
Tonometry, blood, in determination of alveolar-arterial oxygen gradients, 324
Training, physical: *see* Physical training
Transducer, motion
blast injury, 430
crash research, 430
Transducer, mechanoelectric, for recording transient motion, 430
Transformer, differential, in catheter-tip gauge for measuring blood flow and vessel diameter, 259
Transistor pump, for on-line digital integrator, 593
Transmitter, implanted, for body temperature measurement, 439
Trauma, of injection, 570
Tremor recording, in unrestrained small animals, 598
Turtle, diving, metabolic depression and oxygen depletion, 503

Urea-^{14}C distribution
in pregnancy, 828
intrarenal, 106
Urine
concentration, Macaca speciosa, 366
fetal, acid loading, in sheep, 135
Uterine vein, oxygen tensions, 787
Uterine wall, oxygen tensions, venules, 787
Uterus
activities during labor, 317
blood flow, uneven, 787

Vagal blockade
heart rate, 782
stroke volume, 782
ventricular output, 782
Valve box, for determining water vapor pressure of end-tidal air, 229
Van Slyke-Neill technique, for blood gas analysis, 119
Vascular processes: *see* Blood vessels, or specific anatomical location or vessel
Velocity probe
catheter-tip, 236
thermistor, linear, 236
Venous admixture, ventilation-perfusion ratios during vasoconstriction, 491
Venous blood flow, phasic variations, plethysmographic measurement, 124
Venous hematocrit, during exercise, 622
Ventilation
abdomen in, during exercise, 159
aerobic capacity at altitude, 685
age differences, 49
altitude, 607, 685, 792
artificial, alveolar carbon dioxide tension during, 556
carbon dioxide influences, at altitude, 607
carbon dioxide stores, 809
exercise, 159, 518
exercise after physical training, 518
hypoxia, 607, 755
inspired gas distribution, 129
lung volume, 658
magnesium chloride, 755
maximal, at altitude, 792
nitrogen washout, 658
nonuniform distribution, 49
oxygen storage, dynamics, 809
respiratory pattern, 49
rib cage in, during exercise, 159
running performance at altitude, 685
Ventilation-perfusion ratio
lung model, mathematical analysis, 549
pulmonary blood flow distribution, 668
pulmonary vasoconstriction, 491
Vibrations, mechanoelectric transducer for, 430
Vicuna, erythrokinetics, 93
Videoangiography
biplane roentgen image intensification, 724
dynamic shape measurement, 724
dynamic volume measurement, 724
heart, 217, 724
mitral valve closure during atrial fibrillation, 217
Videodensitometry, roentgen, mitral valve closure during atrial fibrillation, 217
Vital capacity, oxygen toxicity and, 529
Voltage to frequency conversion, on-line digital integrator for, 593
Volume: *see also* Lung volume
standardization, in airways conductance studies, 310

Contents of Volume 24

No. 1. JANUARY 1968

CIRCULATION

Cerebral carbohydrate metabolism of man during respiratory and metabolic alkalosis. *Alexander, S. C., T. C. Smith, G. Strobel, G. W. Stephen, and H. Wollman* 66
Plethysmographic techniques for the measurement of phasic variations in venous return. *Mackay, I. F. S., and P. Van Loon* 124
Regional pulse-wave velocity in the arterial tree. *McDonald, D. A* 73
Effect of circulatory occlusion on time to muscular fatigue. *Myers, S. J., and W. P. Sullivan* 54
A fully automatic portable blood pressure recorder. *Schneider, R. A* 115
Cerebral blood volume: values obtained with ^{51}Cr-labeled red blood cells and RISA. *Sklar, F. H., E. F. Burke, Jr., and T. W. Langfitt* 79
Effects of extremes of respiratory and metabolic alkalosis on cerebral blood flow in man. *Wollman, H., T. C. Smith, G. W. Stephen, E. T. Colton III, H. E. Gleaton, and S. C. Alexander* 60

RESPIRATION

Cerebral carbohydrate metabolism of man during respiratory and metabolic alkalosis. *Alexander, S. C., T. C. Smith, G. Strobel, G. W. Stephen, and H. Wollman* 66
Effects of respiratory pattern on age differences in ventilation uniformity. *Edelman, N. H., C. Mittman, A. H. Norris, and N. W. Shock* 49
Effects of acetazolamide and hypoxia on cerebrospinal fluid bicarbonate. *Kronenberg, R. S., and S. M. Cain* 17
Acute mechanical effects of lung volume changes on artificial microholes in alveolar walls. *Kuno, K., and N. C. Staub* 83
A recirculation system for the determination of blood gases by gas chromatography. *Ortega, F. G., and G. J. Tammeling* 119
A constant-flow valve for respiratory gas sampling. *Osborn, J. J., J. H. Shore, and S. E. Elliott* 113
Polarographic respirometer for the isolated perfused rat kidney. *Turner, M. D., W. A. Neely, and H. R. Pitts* 102
Effects of extremes of respiratory and metabolic alkalosis on cerebral blood flow in man. *Wollman, H., T. C. Smith, G. W. Stephen, E. T. Colton III, H. E. Gleaton, and S. C. Alexander* 60

RENAL AND ELECTROLYTE PHYSIOLOGY

Long-term arterial catheterization for use in chaired laboratory primates. *Jennings, P. B., and J. A. Gagnon* 109
Effects of acetazolamide and hypoxia on cerebrospinal fluid bicarbonate. *Kronenberg, R. S., and S. M. Cain* 17
Radioautographic demonstration of the intrarenal distribution of diffusable substances. *Rabinowitz, L., and P. Z. Barry* 106

GASTROINTESTINAL PHYSIOLOGY

Passive movement of water and sodium across the human small intestinal mucosa. *Soergel, K. H., G. E. Whalen, and J. A. Harris* 40

ENDOCRINOLOGY AND METABOLISM

Cerebral carbohydrate metabolism of man during respiratory and metabolic alkalosis. *Alexander, S. C., T. C. Smith, G. Strobel, G. W. Stephen, and H. Wollman* 66
Metabolic balance studies during induced hyperthermia in man. *Beisel, W. R., R. F. Goldman, and R. J. T. Joy* 1
Energy metabolism of the albino rat at minimal levels of spontaneous muscular activity. *Bramante, P. O.* 11
Effects of extremes of respiratory and metabolic alkalosis on cerebral blood flow in man. *Wollman, H., T. C. Smith, G. W. Stephen, E. T. Colton III, H. E. Gleaton, and S. C. Alexander* 60

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Energy metabolism of the albino rat at minimal levels of spontaneous muscular activity. *Bramante, P. O* 11
Positive work done by a previously stretched muscle. *Cavagna, G. A., B. Dusman, and R. Margaria* 21
Homeostasis in animals (*Sus domesticus*) during exposure to a warm environment. *Forrest, J. C., J. A. Will, G. R. Schmidt, M. D. Judge, and E. J. Briskey* 33
Long-term arterial catheterization for use in chaired laboratory primates. *Jennings, P. B., and J. A. Gagnon* 109
Effects of acetazolamide and hypoxia on cerebrospinal fluid bicarbonate. *Kronenberg, R. S., and S. M. Cain* 17
Heart rate response to submaximal exercise in the Standardbred horse. *Marsland, W. P.* 98
Effect of circulatory occlusion on time to muscular fatigue. *Myers, S. J., and W. P. Sullivan* 54
Erythrokinetics in high-altitude-adapted animals (llama, alpaca, and vicuña). *Reynafarje, C., J. Faura, A. Paredes, and D. Villavicencio* 93
A fully automatic portable blood pressure recorder. *Schneider, R. A* 115

COMPARATIVE AND GENERAL PHYSIOLOGY

Heart rate response to submaximal exercise in the Standardbred horse. *Marsland, W. P* 98
Erythrokinetics in high-altitude-adapted animals (llama, alpaca, and vicuña). *Reynafarje, C., J. Faura, A. Paredes, and D. Villavicencio* 93
A fully automatic portable blood pressure recorder. *Schneider, R. A* 115

NEUROPHYSIOLOGY

Long-term arterial catheterization for use in chaired laboratory primates. *Jennings, P. B., and J. A. Gagnon* 109

HEMATOLOGY

Erythrokinetics in high-altitude-adapted animals (llama, alpaca, and vicuña). *Reynafarje, C., J. Faura, A. Paredes, and D. Villavicencio* 93

MUSCLE PHYSIOLOGY

Positive work done by a previously stretched muscle. *Cavagna, G. A., B. Dusman, and R. Margaria* 21
Homeostasis in animals (*Sus domesticus*) during exposure to a warm environment. *Forrest, J. C., J. A. Will, G. R. Schmidt, M. D. Judge, and E. J. Briskey* 33

Effect of circulatory occlusion on time to muscular fatigue. *Myers, S. J., and W. P. Sullivan* 54

SPECIAL COMMUNICATIONS

Long-term arterial catheterization for use in chaired laboratory primates. *Jennings, P. B., and J. A. Gagnon* ... 109
Plethysmographic techniques for the measurement of phasic variations in venous return. *Mackay, I. F. S., and P. Van Loon* 124
A recirculation system for the determination of blood gases by gas chromatography. *Ortega, F. G., and G. J. Tammeling* 119
A constant-flow valve for respiratory gas sampling. *Osborn, J. J., J. H. Shore, and S. E. Elliott* 113
Radioautographic demonstration of the intrarenal distribution of diffusable substances. *Rabinowitz, L., and P. Z. Barry* 106
A fully automatic portable blood pressure recorder. *Schneider, R. A* 115
Polarographic respirometer for the isolated perfused rat kidney. *Turner, M. D., W. A. Neely, and H. R. Pitts* ... 102

No. 2. FEBRUARY 1968

CIRCULATION

Experimental thoracic duct shunt. *Cochrum, K. C., J. T. Okimoto, and J. S. Najarian* 247
Design and evaluation of a new linear thermistor velocity probe. *Grahn, A. R., M. H. Paul, and H. U. Wessel* 236
Demodulation of electrical activity in the carotid sinus baroceptor nerve. *Koushanpour, E., and J. P. McGee* 262
Catheter-tip gauge for measuring blood flow velocity and vessel diameter in dogs. *Pieper, H. P., and L. T. Paul* 259
Derivation of cardiac mechanical parameters from serial biplane angiocardiograms. *Rackley, C. E., W. P. Hood, Jr., L. Cleveland, and R. W. Stacy* 254
Contraction frequency, blood supply, and muscle pain. *Rodbard, S., and E. B. Pragay* 142
Epidermal diffusion barrier to ^{133}Xe in man and studies of clearance of ^{133}Xe by sweat. *Sejrsen, P* 211
A servo-controlled pressure generator for physiological applications. *Spickler, J. W., and E. Koushanpour* 232
A spray-on electrode for recording the electrocardiogram during exercise. *Trank, J., R. Fetter, and R. M. Lauer* ... 267
Acute interruption of major extrinsic cardiac nerves without immediate thoracotomy. *Tsakiris, A. G., and D. E. Donald* 269
Backpack for free-ranging primates. *Watson, N. W., D. L. Franklin, and R. L. Van Citters* 252
Roentgen video densitometer study of mitral valve closure during atrial fibrillation. *Williams, J. C. P., R. A. Vandenberg, T. P. B. O'Donovan, R. E. Sturm, and E. H. Wood* 217

RESPIRATION

Temperature coefficients for P_{CO_2} and P_{O_2} in bloods with varying acid-base status. *Bergman, N. A* 225
Water vapor pressure of end-tidal air of normals and chronic bronchitics.. *Green, I. D., and M. S. Nesarajah* 229
Relative contribution of rib cage and abdomen to ventilation during exercise. *Grimby, G., J. Bunn, and J. Mead* 159
Effect of physical training on the pulmonary diffusing capacity during submaximal work. *Reuschlein, P. S., W. G. Reddan, J. Burpee, J. B. L. Gee, and J. Rankin* 152
Epidermal diffusion barrier to ^{133}Xe in man and studies of clearance of ^{133}Xe by sweat. *Sejrsen, P* 211
Can the distributuion of inspired gas be altered? *Young, A. C., C. J. Martin, and T. Hashimoto* 129

RENAL AND ELECTROLYTE PHYSIOLOGY

Fetal and neonatal response to acid loading in the sheep. *Vaughn, D., T. H. Kirschbaum, T. Bersentes, P. V. Dilts, Jr., and N. S. Assali* 135

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Alveolar gas exchanges during breath-hold dives. *Craig, A. B., Jr., and A. D. Harley* 182
Oxygen consumption and carbon dioxide production during breath-hold diving. *Craig, A. B., Jr., and W. L. Medd* 190
Physiological responses of men during sleep deprivation. *Fiorica, V., E. A. Higgins, P. F. Iampietro, M. T. Lategola, and A. W. Davis* 167
Relative contribution of rib cage and abdomen to ventilation during exercise. *Grimby, G., J. Bunn, and J. Mead* 159
Contraction frequency, blood supply, and muscle pain. *Rodbard, S., and E. B. Pragay* 142
Epidermal diffusion barrier to ^{133}Xe in man and studies of clearance of ^{133}Xe by sweat. *Sejrsen, P* 211
Acclimatization to cold in man induced by frequent scuba diving in cold water. *Skreslet, S., and F. Aarefjord* 177
A spray-on electrode for recording the electrocardiogram during exercise. *Trank, J., R. Fetter, and R. M. Lauer* ... 267
Hematology, blood volume, and oxygen transport of dogs exposed to high altitude. *Vogel, J. A., G. W. Bishop, R. L. Genovese, and T. L. Powell* 203
Backpack for free-ranging primates. *Watson, N. W., D. L. Franklin, R. L. Van Citters* 252
Excretion of catecholamines and catecholamine metabolites in Project Mercury pilots. *Weil-Malherbe, H., E. R. B. Smith, and G. R. Bowles* 146

COMPARATIVE AND GENERAL PHYSIOLOGY

Temperature coefficients for P_{CO_2} and P_{O_2} in bloods with varying acid-base status. *Bergman, N. A* 225
Design and evaluation of a new linear thermistor velocity probe. *Grahn, A. R., M. H. Paul, and H. U. Wessel* 236
Small vessel cannulator. *Pope, R. S* 276
Backpack for free-ranging primates. *Watson, N. W., D. L. Franklin, and R. L. Van Citters* 252

NEUROPHYSIOLOGY

Compact stimulator using integrated circuits and battery power. *Hertzler, E. C., and R. J. Kaminski* 249
A ramp generator for producing continuously advancing stimulus pulses. *Smith, J. W., and C. D. Barnes* 272

HEMATOLOGY

Temperature coefficients for P_{CO_2} and P_{O_2} in bloods with varying acid-base status. *Bergman, N. A* 225
Experimental thoracic duct shunt. *Cochrum, K. C., J. T. Okimoto, and J. S. Najarian* 247
Hematology, blood volume, and oxygen transport of dogs exposed to high altitude. *Vogel, J. A., G. W. Bishop, R. L. Genovese, and T. L. Powell* 203

MUSCLE PHYSIOLOGY

Compact stimulator using integrated circuits and battery power. *Hertzler, E. C., and R. J. Kaminski* 249
Contraction frequency, blood supply, and muscle pain. *Rodbard, S., and E. B. Pragay* 142

OTHER ASPECTS OF PHYSIOLOGY

Physiological responses of men during sleep deprivation. *Fiorica, V., E. A. Higgins, P. F. Iampietro, M. T. Lategola, and A. W. Davis* 197
Fetal and neonatal response to acid loading in the sheep. *Vaughn, D., T. H. Kirschbaum, T. Bersentes, P. V. Dilts, Jr., and N. S. Assali* 135

SPECIAL COMMUNICATIONS

Experimental thoracic duct shunt. *Cochrum, K. C., J. T. Okimoto, and J. S. Najarian* 247
Design and evaluation of a new linear thermistor velocity probe. *Grahn, A. R., M. H. Paul, and H. U. Wessel* 236
Water vapor pressure of end-tidal air of normals and chronic bronchitics. *Green, I. D., and M. S. Nesarajah* 229
Compact stimulator using integrated circuits and battery power. *Hertzler, E. C., and R. J. Kaminski* 249
Demodulation of electrical activity in the carotid sinus baroceptor nerve. *Koushanpour, E., and J. P. McGee* 262
Catheter-tip gauge for measuring blood flow velocity and vessel diameter in dogs. *Pieper, H. P., and L. T. Paul* 259
Small vessel cannulator. *Pope, R. S* 276
Derivation of cardiac mechanical parameters from serial biplane angiocardiograms. *Rackley, C. E., W. P. Hood, Jr., L. Cleveland, and R. W. Stacy* 254
A ramp generator for producing continously advancing stimulus pulses. *Smith, J. W., and C. D. Barnes* 272
A servo-controlled pressure generator for physiological applications. *Spickler, J. W., and E. Koushanpour* 232
A spray-on electrode for recording the electrocardiogram during exercise. *Trank, J., R. Fetter, and R. M. Lauer* ... 267
Acute interruption of major extrinsic cardiac nerves without immediate thoracotomy. *Tsakiris, A. G., and D. E. Donald* 269
Backpack for free-ranging primates. *Watson, N. W., D. L. Franklin, and R. L. Van Citters* 252

No. 3. MARCH 1968

CIRCULATION

A method for quantitative analysis of aortic nerve activity. *Aars, H., and S. Leraand* 416
Measurement of coronary flow in local areas of myocardium using xenon 133. *Brandi, G., W. M. Fam, and M. McGregor* 446
Measurement of cardiac output by thermal dilution in man. *Branthwaite, M. A., and R. D. Bradley* 434
Effect of inspired O_2 on cardiopulmonary and metabolic responses to exercise in man. *Hughes, R. L., M. Clode, R. H. T. Edwards, T. J. Goodwin, and N. L. Jones* 336
Heat uptake and dermal conductance in forearm and hand when heated. *Kamon, E., and H. S. Belding* 277
Modification of the Bailey bottle for use with modern gas analyzers. *Kjellberg, C., and G. Fayette* 412
Comparison of CO_2-rebreathing and direct Fick methods for determining cardiac output. *Muiesan, G., C. A. Sorbini, E. Solinas, V. Grassi, G. Casucci, and E. Petz* 424
Dye injector for use in cardiovascular studies. *Reininger, E. J* 451
Comparison of hypoxia, pH, and sympathomimetic drugs on bovine pulmonary vasculature. *Silove, E. D., I. Inoue, and R. F. Grover* 355
A cardiac contractility computer. *Zieske, H. A., and M. N. Levy* 419

RESPIRATION

Lung tissue resistance and pulmonary hysteresis, *Bachofen, H* 296
Servo control of inhaled carbon dioxide. *Bellville, J. W., G. Fleischli, and G. Attura* 414
Quantitative displacement of acid-base equilibrium in chronic respiratory acidosis. *Engel, K., R. B. Dell, W. J. Rahill, C. R. Denning, and R. W. Winters* 288
Factors affecting airways conductance: a study of 752 working men. *Guyatt, A. R., and J. H. Alpers* 310
Morphology of the bronchial tree in man. *Horsfield, K., and G. Cumming* 373
Functional consequences of airways morphology. *Horsfield, K., and G. Cumming* 384
Effect of inspired O_2 on cardiopulmonary and metabolic responses to exercise in man. *Hughes, R. L., M. Clode, R. H. T. Edwards, T. J. Goodwin, and N. L. Jones* 336
Modification of the Bailey bottle for use with modern gas analyzers. *Kjellberg, C., and G. Fayette* 412
Alveolar-arterial gradients for oxygen at 1, 2, and 3 atmospheres absolute. *McDowall, D. G., I. McA. Ledingham, and S. Tindal* 324
Comparison of CO_2-rebreathing and direct Fick methods for determining cardiac output. *Muiesan, G., C. A. Sorbini, E. Solinas, V. Grassi, G. Casucci, and E. Petz* 424
A gas transferring device for the Haldane apparatus. *Reininger, E. J* 455
Comparison of hypoxia, pH, and sympathomimetic drugs on bovine pulmonary vasculature. *Silove, E. D., I. Inoue, and R. F. Grover* 355
Static volume-pressure curves of dog lungs—in vivo and in vitro. *Wohl, M. E. B., J. Turner, and J. Mead* 348

RENAL AND ELECTROLYTE PHYSIOLOGY

Quantitative displacement of acid-base equilibrium in chronic respiratory acidosis. *Engel, K., R. B. Dell, W. J. Rahill, C. R. Denning, and R. W. Winters* 288
Renal function in *Macaca speciosa*. *O'Dell, R. M., H. M. Radwin, L. H. Bernstein, and J. U. Schlegel* 366

ENDOCRINOLOGY AND METABOLISM

Uterine and milk-ejecting activities during human labor. *Cobo, E* 317
Environmental factors in the adverse effect of helium on embryonic development. *Weiss, H. S., and R. A. Wright* 330

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

A mechanoelectric transducer for recording transient motion in biological experiments. *Clemedson, C.-J., and A. Jönsson* 430
An implantable telemetry unit for accurate body temperature measurements. *Epstein, R. J., J. R. Haumann, and R. B. Keener* 439
A thermoregulatory function test. *Fox, R. H., G. W. Crockford, and B. Löfstedt* 391
Effect of inspired O_2 on cardiopulmonary and metabolic responses to exercise in man. *Hughes, R. L., M. Clode, R. H. T. Edwards, T. J. Goodwin, and N. L. Jones* 336
Heat uptake and dermal conductance in forearm and hand when heated. *Kamon, E., and H. S. Belding* 277
Modification of the Bailey bottle for use with modern gas analyzers. *Kjellberg, C., and G. Fayette* 412
Variations of certain blood constituents during acute heat exposure. *Senay, L. C., Jr., and M. L. Christensen* 302
Environmental factors in the adverse effects of helium on embryonic development. *Weiss, H. S., and R. A. Wright* 330
Circadian oscillations of three parameters at defined light intensities and color. *Winget, C. M., D. H. Card, and J. M. Pope* 401

Reactions to cold. *Wyndham, C. H., C. G. Williams, and H. Loots* 282

COMPARATIVE AND GENERAL PHYSIOLOGY

Normal values for semen collected from Spanish goats by two methods. *Austin, J. W., R. B. Leidy, G. M. Krise, and E. W. Hupp* 369
A mechanoelectric transducer for recording transient motion in biological experiments. *Clemedson, C.-J., and A. Jönsson* 430
An implantable telemetry unit for accurate body temperature measurements. *Epstein, R. J., J. R. Haumann, and R. B. Keener* 439
A thermoregulatory function test. *Fox, R. H., G. W. Crockford, and B. Löfstedt* 391
Morphology of the bronchial tree in man. *Horsfield, K., and G. Cumming* 373
Functional consequences of airways morphology. *Horsfield, K., and G. Cumming* 384
Renal function in *Macaca speciosa*. *O'Dell, R. M., H. M. Radwin, L. H. Bernstein, and J. U. Schlegel* 366
Comparison of hypoxia, pH, and sympathomimetic drugs on bovine pulmonary vasculature. *Silove, E. D., I. Inoue, and R. F. Grover* 355
A rat head-perfusion technique developed for the study of brain uptake of materials. *Thompson, A. M., R. C. Robertson, and T. A. Bauer* 407
Circadian oscillations of three parameters at defined light intensities and color. *Winget, C. M., D. H. Card, and J. M. Pope* 401

NEUROPHYSIOLOGY

A method for quantitative analysis of aortic nerve activity. *Aars, H., and S. Leraand* 416
Uterine and milk-ejecting activities during human labor. *Cobo, E* 317

A cardiac contractility computer. *Zieske, H. A., and M. N. Levy* 419

No. 4. APRIL 1968

CIRCULATION

Capping and stabilizing chronic intravascular cannulae. *Baker, M. A., E. Burrell, J. Penkhus, and J. N. Hayward* 577
Effect of training on circulatory response to exercise. *Ekblom, B., P.-O. Åstrand, B. Saltin, J. Stenberg, and B. Wallström* 518
Effect of pulmonary vasoconstriction on balance between alveolar ventilation and perfusion. *Haas, F., and E. H. Bergofsky* 491
An instant heart rate monitor. *Hamilton, L. L.* 585
Effects of exercise and its cessation on the heart and its blood supply. *Leon, A. S., and C. M. Bloor* 485
Failure of precordial-to-arterial clearance ratios to predict a coronary flow index. *MacIntyre, W. J., and W. H. Pritchard* 464
A new, miniaturized, multichannel, personal radiotelemetry system. *Murray, R. H., A. Marko, A. T. Kissen, and D. W. McGuire* 588
Aortic blood pressure and velocity as a function of time and position. *Olson, R. M* 563
Direct continuous recording of plasma colloid osmotic pressure of whole blood. *Prather, J. W., K. A. Gaar, Jr., and A. C. Guyton* 602
Alterations in the pulmonary capillary bed during early O_2 toxicity in man. *Puy, R. J. M., R. W. Hyde, A. B. Fisher, J. M. Clark, J. Dickson, and C. J. Lambertsen* 537
A new mode of support for the isolated lung preparation. *Ratliff, J. L* 600
Variable-frequency cardiac pacemaker for use with the trained, unanesthetized dog. *Reininger, E. J., and E. J. Hinchey* 580
Splanchnic blood flow and metabolism in heat-stressed man. *Rowell, L. B., G. L. Brengelmann, J. R. Blackmon, R. D. Twiss, and F. Kusumi* 475
Atraumatic local labeling of skin by inert gas: epicutaneous application of xenon 133. *Sejrsen, P* 570
Alveolar bubble-stability method in the study of lung alveolar surfactant. *Slavkovic, V., L. E. Wingo, R. G. Ellison, and L. T. Ellison* 510

RESPIRATION

Effect of oxygen at 2 atmospheres on the pulmonary mechanics of normal man. *Fisher, A. B., R. W. Hyde, R. J. M. Puy, J. M. Clark, and C. J. Lambertsen* 529
Effect of pulmonary vasoconstriction on balance between alveolar ventilation and perfusion. *Haas, F., and E. H. Bergofsky* 491
Static volume-pressure characteristics of the rib cage and abdomen. *Konno, K., and J. Mead* 544
A new, miniaturized, multichannel, personal radiotelemetry

system. *Murray, R. H., A. Marko, A. T. Kissen, and D. W. McGuire* 588
Solubility of O_2 and CO in blood and pulmonary and placental tissue. *Power, G. G.* 468
Alterations in the pulmonary capillary bed during early O_2 toxicity in man. *Puy, R. J. M., R. W. Hyde, A. B. Fisher, J. M. Clark, J. Dickson, and C. J. Lambertsen* 537
A new mode of support for the isolated lung preparation. *Ratliff, J. L* 600
Alveolar bubble-stability method in the study of lung alveolar surfactant. *Slavkovic, V., L. E. Wingo, R. G. Ellison, and L. T. Ellison* 510
A mathematical analysis of physiological dead space in a lung model. *Suwa, K., and H. H. Bendixen* 549
Change in $Paco_2$ with mechanical dead space during artificial ventilation. *Suwa, K., and H. H. Bendixen* 556

RENAL AND ELECTROLYTE PHYSIOLOGY

Myocardial potassium uptake with constant arterial potassium concentration. *Gonzalez, N. C., T. Hojo, and E. B. Brown, Jr* 498

ENDOCRINOLOGY AND METABOLISM

Metabolic depression and oxygen depletion in the diving turtle. *Jackson, D. C* 503
Splanchnic blood flow and metabolism in heat-stressed man. *Rowell, L. B., G. L. Brengelmann, J. R. Blackmon, R. D. Twiss, and F. Kusumi* 475

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Effect of oxygen at 2 atmospheres on the pulmonary mechanics of normal man. *Fisher, A. B., R. W. Hyde, R. J. M. Puy, J. M. Clark, and C. J. Lambertsen* 529
A nerve electrode for chronic implantation in the extremities of small animals. *Heusner, W. W., R. E. Carrow, W. D. Van Huss, W. D. Collings, and K. Coutts* 573
Metabolic depression and oxygen depletion in the diving turtle. *Jackson, D. C* 503
Effects of exercise and its cessation on the heart and its blood supply. *Leon, A. S., and C. M. Bloor* 485
A new, miniaturized, multichannel, personal radiotelemetry system. *Murray, R. H., A. Marko, A. T. Kissen, and D. W. McGuire* 588
Alterations in the pulmonary capilary bed during early O_2 toxicity in man. *Puy, R. J. M., R. W. Hyde, A. B. Fisher, J. M. Clark, J. Dickson, and C. J. Lambertsen* 537
A new mode of support for the isolated lung preparation. *Ratliff, J. L* 600
Splanchnic blood flow and metabolism in heat-stressed man. *Rowell, L. B., G. L. Brengelmann, J. R. Blackmon, R. D. Twiss, and F. Kusumi* 475
Influence of motivation on physical work capacity and performance. *Wilmore, J. H* 459

COMPARATIVE AND GENERAL PHYSIOLOGY

A simple method for recording tremors in small animals. *Dill, R. E., H. L. Dorman, and W. M. Nickey* 598
Myocardial potassium uptake with constant arterial potassium concentration. *Gonzalez, N. C., T. Hojo, and E. B. Brown, Jr* 498
Metabolic depression and oxygen depletion in the diving turtle. *Jackson, D. C* 503

NEUROPHYSIOLOGY

Capping and stabilizing chronic intravascular cannulae. *Baker, M. A., E. Burrell, J. Penkhus, and J. N. Hayward* 577
A simple method for recording tremors in small animals. *Dill, R. E., H. L. Dorman, and W. M. Nickey* 598

MUSCLE PHYSIOLOGY

A simple method for recording tremors in small animals. *Dill, R. E., H. L. Dorman, and W. M. Nickey* 598
Effect of pulmonary vasoconstriction on balance between alveolar ventilation and perfusion. *Haas, F., and E. H. Bergofsky* 491
A nerve electrode for chronic implantation in the extremities of small animals. *Heusner, W. W., R. E. Carrow, W. D. Van Huss, W. D. Collings, and K. Coutts* 573
A transistorized high-current, long-pulse amplifier for massive stimulation of isolated skeletal muscle. *Ross, S. M., and M. Brust* 583

OTHER ASPECTS OF PHYSIOLOGY

An on-line digital integrator for physiological data *Freeman, J. A., and R. E. Smith* 593
Myocardial potassium uptake with constant arterial potassium concentration. *Gonzalez, N. C., T. Hojo, and E. B. Brown, Jr* 498
Direct continuous recording of plasma colloid osmotic pressure of whole blood. *Prather, J. W., K. A. Gaar, Jr., and A. C. Guyton* 602

No. 5. MAY 1968

CIRCULATION

Effect of pulmonary vascular pressures on single-breath CO diffusing capacity in dogs. *Burgess, J. H., J. Gillespie, P. D. Graff, and J. A. Nadel* 692
Lability of the pulmonary wedge pressure in the calf. *Droszcz, W. A., F. LaTorre, and J. T. Reeves* 640

Detection of erythrocytes passing through capillaries by a photocell-computer technique. *Harris, P. D., J. E. Randall, and P. A. Nicoll* ... 728
Continuous measurement of internal left ventricular diameter. *Horwitz, L. D., V. S. Bishop, H. L. Stone, and H. F. Stegall* ... 738
Distribution function of pulmonary blood flow and ventilation-perfusion ratio in man. *Lenfant, C., and T. Okubo* ... 668
Critical closure of pulmonary vessels analyzed in terms of Starling resistor model. *Lopez-Muniz, R., N. L. Stephens, B. Bromberger-Barnea, S. Permutt, and R. L. Riley* ... 625
Digital coder for real-time clocking and data identification in physiologic research. *Singer, N. A., and M. Takahashi* ... 711
Biplane videoangiography. *Williams, J. C. P., R. E. Sturm, A. G. Tsakiris, and E. H. Wood* ... 724

RESPIRATION

Effect of pulmonary vascular pressures on single-breath CO diffusing capacity in dogs. *Burgess, J. H., J. Gillespie, P. D. Graff, and J. A. Nadel* ... 692
Limitations to the prediction of maximum oxygen intake from cardiac frequency measurements. *Davies, C. T. M* ... 700
Influence of CO_2 on ventilatory acclimatization to altitude. *Eger, E. I. II, R. H. Kellogg, A. H. Mines, M. Lima-Ostos, C. G. Morrill, and D. W. Kent* ... 607
Distribution function of pulmonary blood flow and ventilation-perfusion ratio in man. *Lenfant, C., and T. Okubo* ... 668
Critical closure of pulmonary vessels analyzed in terms of Starling resistor model. *Lopez-Muniz, R., N. L. Stephens, B. Bromberger-Barnea, S. Permutt, and R. L. Riley* ... 625
Distribution function of lung volume and ventilation determined by lung N_2 washout. *Okubo, T., and C. Lenfant* ... 658
Respiratory responses to headstand posture. *Rao, S* ... 697
On-line parametric function display. *Stolwijk, J. A. J., H. Graichen, and A. Bouhuys* ... 715
Pulmonary hypothermia in dogs. *Zikria, B. A., J. M. Ferrer, and J. R. Malm* ... 707

GASTROINTESTINAL PHYSIOLOGY

A simplified two-stage hepatectomy in the rat. *Bollman, J. L., and E. Van Hook* ... 722
Effect of duct pressure on the rate of salivary secretion and blood flow in the dog. *Lubarsky, A., and P. A. Nicoll* ... 653

ENDOCRINOLOGY AND METABOLISM

3-Methoxy-4-hydroxymandelic acid excretion during physical exercise. *Neal, C., C. Smith, K. Dubowski, and J. Naughton* ... 619
Body temperature and metabolism in hyperbaric helium atmospheres. *Raymond, L. W., W. H. Bell II, K. R. Bondi, and C. R. Lindberg* ... 678

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Effect of temperature and pyrogens on single-unit activity in the rabbit's brain stem. *Cabanac, M., J. A. J. Stolwijk, and J. D. Hardy* ... 645
Endurance of preheated men in exhausting work. *Craig, F. N., and H. L. Froehlich* ... 636
Limitations to the prediction of maximum oxygen intake from cardiac frequency measurements. *Davies, C. T. M* ... 700
Influence of CO_2 on ventilatory acclimatization to altitude. *Eger, E. I. II, R. H. Kellogg, A. H. Mines, M. Lima-Ostos, C. G. Morrill, and D. W. Kent* ... 607
Maximum aerobic capacity and running performance at altitude. *Faulkner, J. A., J. Kollias, C. B. Favour, E. R. Buskirk, and B. Balke* ... 685
Lactic dehydrogenase isozymes: variations in the plasma of men exposed to cold. *Mager, M., W. F. Blatt, and R. W. Neuman* ... 616
3-Methoxy-4-hydroxymandelic acid excretion during physical exercise. *Neal, C., C. Smith, K. Dubowski, and J. Naughton* ... 619
Effect of exercise on blood volume. *Oscai, L. B., B. T. Williams, and B. A. Hertig* ... 622
Bosy temperature and metabolism in hyperbaric helium atmospheres. *Raymond, L. W., W. H. Bell II, K. R. Bondi, and C. R. Lindberg* ... 678
Prediction of solar heat load on man. *Roller, W. L., and R. F. Goldman* ... 717
Reversible physiologic disability as a criterion for altitude tolerance of the rat. *Rosenstein, R., and C. M. Moore* ... 733

COMPARATIVE AND GENERAL PHYSIOLOGY

Prediction of solar heat load on man. *Roller, W. L., and R. F. Goldman* ... 717
An integrated-circuit pulse-height analyzer for physiological research. *Walsh, L. F., W. J. Mueller, and R. J. O'Connell* ... 736
Pulmonary hypothermia in dogs. *Zikria, B. A., J. M. Ferrer, and J. R. Malm* ... 707

NEUROPHYSIOLOGY

Effect of temperature and pyrogens on single-unit activity in the rabbit's brain stem. *Cabanac, M., J. A. J. Stolwijk, and J. D. Hardy* ... 645
Reversible physiologic disability as a criterion for altitude tolerance of the rat. *Rosenstein, R., and C. M. Moore* ... 733

Digital coder for real-time clocking and data identification in physiologic research. *Singer, N. A., and M. Takahashi* ... 711

SPECIAL COMMUNICATIONS

A simplified two-stage hepatectomy in the rat. *Bollman, J. L., and E. Van Hook* ... 722
Detection of erythrocytes passing through capillaries by a photocell-computer technique. *Harris, P. D., J. E. Randall, and P. A. Nicoll* ... 728
Continuous measurement of internal left ventricular diameter. *Horwitz, L. D., V. S. Bishop, H. L. Stone, and H. F. Stegall* ... 738
Prediction of solar heat load on man. *Roller, W. L., and R. F. Goldman* ... 717
Reversible physiologic disability as a criterion for altitude

tolerance of the rat. *Rosenstein, R., and C. M. Moore* 733
Digital coder for real-time clocking and data identification in physiologic research. *Singer, N. A., and M. Takahashi* 711
On-line parametric function display. *Stolwijk, J. A. J., H. Graichen, and A. Bouhuys* 715
An integrated-circuit pulse-height analyzer for physiological research. *Walsh, L. F., W. J. Mueller, and R. J. O'Connell* 736
Biplane videoangiography. *Williams, J. C. P., R. E. Sturm, A. G. Tsakiris, and E. H. Wood* 724

No. 6. JUNE 1968

CIRCULATION

Man's responses to breath-hold exercise in air and in water. *Craig, A. B., Jr., and W. L. Medd* 773
Reduction of hypoxic pulmonary vasoconstriction by magnesium chloride. *Cropp, G. J. A* 755
Xenon 133 myocardial blood flow determination: a simple new balloon technique. *Dietzman, R. H., E. D. Nordberg, M. K. Loken, and R. C. Lillehei* 840
O_2 tensions of blood from uterine wall venules, maternal placental venules, and uterine vein. *Longo, L. D., R. H. Schwarz, and R. E. Forster II* 787
A biopsy drill permitting rapid freezing. *Pool, P. E., G. F. Norris, R. M. Lewis, and J. W. Covell* 832
Conversion of glucose phosphate-^{14}C to glucose-^{14}C in passage through human brain in vivo. *Sacks, W., and S. Sacks* 817
Ventricular output in conscious dogs following acute vagal blockade. *Stone, H. L., and V. S. Bishop* 782

RESPIRATION

Dynamics of oxygen stores changes following an alteration in ventilation. *Cherniack, N. S., G. S. Longobardo, F. P. Palermo, and M. Heymann* 809
Man's responses to breath-hold exercise in air and in water. *Craig, A. B., Jr., and W. L. Medd* 773
Reduction of hypoxic pulmonary vasoconstriction by magnesium chloride. *Cropp, G. J. A* 755
Measurement of oxygen consumption of rat bone marrow cells by a polarographic method. *Gesinski, R. M., J. H. Morrison, and J. R. Toepfer* 751
A simple arterial occluder. *Beran, A. V., J. Strauss, C. T. Brown, and N. Katurich* 838
Work capacity of long-time residents and newcomers to altitude. *Kollias, J., E. R. Buskirk, R. F. Akers, E. K. Prokop, P. T. Baker, and E. Picón-Reátegui* 792
O_2 tensions of blood from uterine wall venules, maternal placental venules, and uterine vein. *Longo, L. D., R. H. Schwarz, and R. E. Forster II* 787
Influence of diaphragm activity on the measurement of total chest compliance. *Miranda, J. M., and R. V. Lourenço* 741
Theoretical analysis of airway resistances on an inhomogeneous lung. *Peslin, R.* 761

RENAL AND ELECTROLYTE PHYSIOLOGY

A simple technique for peritoneal lavage in unrestrained small laboratory animals. *Atkins, R. C., and F. W. Gurr* 836
A simple arterial occluder. *Beran, A. V., J. Strauss, C. T. Brown, and N. Katurich* 838
Reduction of hypoxic pulmonary vasoconstriction by magnesium chloride. *Cropp, G. J. A* 755
Distribution of urea-^{14}C in pregnant mice studied by whole-body autoradiography. *Waddell, W. J.* 828

ENDOCRINOLOGY AND METABOLISM

Conversion of glucose phosphate-^{14}C to glucose-^{14}C in passage through human brain in vivo. *Sacks, W., and S. Sacks* 817

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Effects of inert gases on tolearance of rats to hypoxia. *Altland, P. D., H. F. Brubach, and M. G. Parker* 778
An airlock for feeding animals in a small environmental chamber. *Birdwell, T. R., and D. E. Phillips* 834
Man's responses to breath-hold exercise in air and in water. *Craig, A. B., Jr., and W. L. Medd* 773
Colonic temperature response of rats during exercise. *Gollnick, P. D., and C. D. Ianuzzo* 747
Work capacity of long-time residents and newcomers to altitude. *Kollias, J., E. R. Buskirk, R. F. Akers, E. K. Prokop, P. T. Baker, and E. Picón-Reátegui* 792
An immediate irradiation effect on resistance of rats to low temperature. *R. D. Phillips, and D. J. Kimeldorf* 768
Heat reactions of US students during a multitemperature test. *Williams, C. G., and C. H. Wyndham* 800

COMPARATIVE AND GENERAL PHYSIOLOGY

Dynamics of oxygen stores changes following an alteration in ventilation. *Cherniack, N. S., G. S. Longobardo, F. P. Palermo, and M. Heymann* 809
Influence of diaphragm activity on the measurement of total chest compliance. *Miranda, J. M., and R. V. Lourenço* 741
A biopsy drill permitting rapid freezing. *Pool, P. E., G. F. Norris, R. M. Lewis, and J. W. Covell* 832
Distribution of urea-^{14}C in pregnant mice studied by whole-body autoradiography. *Waddell, W. J.* 828

HEMATOLOGY

Measurement of oxygen consumption of rat bone marrow cells by a polagraphic method. *Gesinski, R. M., J. H. Morrison, and J. R. Toepfer* 751

MUSCLE PHYSIOLOGY

Influence of diaphragm activity on the measurement of total chest compliance. *Miranda, J. M., and R. V. Lourenço* 741
A biopsy drill permitting rapid freezing. *Pool, P. E., G. F. Norris, R. M. Lewis, and J. W. Covell* 832

OTHER ASPECTS OF PHYSIOLOGY

An airlock for feeding animals in a small environmental chamber. *Birdwell, T. R., and D. E. Phillips* 834
O_2 tensions of blood from uterine wall venules, maternal placental venules, and uterine vein. *Longo, L. D., R. H. Schwarz, and R. E. Forster II* 787
An immediate irradiation effect on resistance of rats to low temperature. *Phillips, R. D., and D. J. Kimeldorf* 768

SPECIAL COMMUNICATIONS

A simple technique for peritoneal lavage in unrestrained small laboratory animals. *Atkins, R. C., and F. W. Gurr* 836
A simple arterial occluder. *Beran, A. V., J. Strauss, C. T. Brown, and N. Katurich* 838
An airlock for feeding animals in small environmental chamber. *Birdwell, T. R., and D. E. Phillips* 834
Xenon 133 myocardial blood flow determination: a simple new balloon technique. *Dietzman, R. H., E. D. Nordberg, M. K. Loken, and R. C. Lillehei* 840
A biopsy drill permitting rapid freezing. *Pool, P. E., G. F. Norris, R. M. Lewis, and J. W. Covell* 832

Contents of Volume 25

No. 1. JULY 1968

CIRCULATION

Diaphragm and abdominal muscle activity during induced hypotension. *Bishop, B.* ... 73
Cardiopulmonary responses to head immersion in domestic geese. *Cohn, J. E., J. Krog, and R. Shannon.* ... 36
A device for obtaining multiple brief timed synchronous samples of blood. *El-Ramli, H. A., B. Pullen, R. A. L. Brewis, and J. B. L. Howell* ... 98
Distribution of ventilation, blood flow, and gas transfer coefficients in the lung. *Johnson, R. L., Jr., and J. M. Miller* ... 1
Effect of negative-pressure inflation on pulmonary vascular flow. *Kira, S., and Y. Hukushima* ... 42

RESPIRATION

Diaphragm and abdominal muscle activity during induced hypotension. *Bishop, B.* ... 73
Recovery of free cells from rat lungs by repeated washings. *Brain, J. D., and N. R. Frank* ... 63
Splenic contributions to pulmonary diffusing capacity in dogs and man. *Brashear, R. E., and J. C. Ross* ... 48
Cardiopulmonary responses to head immersion in domestic geese. *Cohn, J. E., J. Krog, and R. Shannon* ... 36
A device for obtaining multiple brief timed synchronous samples of blood. *El-Ramli, H. A., B. Pullen, R. A. L. Brewis, and J. B. L. Howell* ... 98
Distribution of ventilation, blood flow, and gas transfer coefficients in the lung. *Johnson, R. L., Jr., and J. M. Miller* ... 1
Effect of negative-pressure inflation on pulmonary vascular flow. *Kira, S., and Y. Hukushima* ... 42
Ventilatory cost of exercise in chronic obstructive pulmonary disease. *Levison, H., and R. M. Cherniack* ... 21
Hemodynamics and alveolar-arterial Po_2 differences at varying Pa_{O_2} in anesthetized man. *Prys-Roberts, C., G. R. Kelman, R. Greenbaum, M. L. Kain, and J. Bay* ... 80

GASTROINTESTINAL PHYSIOLOGY

Time to achieve steady-state luminal glucose concentration during intestinal lavage. *Zatzman, M. L., and J. D. Moore* ... 95

ENDOCRINOLOGY AND METABOLISM

Influence of dietary deprivations on plasma concentration of free amino acids of man. *Adibi, S. A.* ... 52
In vitro carbohydrate metabolism in the rat after chronic exposure to hypoxia. *Davidson, M. B.* ... 105

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Diving reflex after physical training. *Bove, A. A., P. R. Lynch, J. V. Connell, Jr., and J. M. Harding* ... 70
Thermal regulation of man exercising during water immersion. *Craig, A. B., Jr., and M. Dvorak* ... 28
In vitro carbohydrate metabolism in the rat after chronic exposure to hypoxia. *Davidson, M. B.* ... 105
Prediction of body density from skin-fold and girth measurements of college females. *Katch, F. I., and E. D. Michael, Jr.* ... 92
Ventilatory cost of exercise in chronic obstructive pulmonary disease. *Levison, H., and R. M. Cherniack* ... 21
Effect of temperature, exercise, and physical fitness on the triceps surae reflex. *Petajan, J. H., and C. J. Eagan* ... 16
Oxygen debt in aerobic work. *Schneider, E. G., S. Robinson, and J. L. Newton* ... 58
Test box and restraining harness for small animal behavioral studies. *Spector, N. H.* ... 101

COMPARATIVE AND GENERAL PHYSIOLOGY

Lactate dehydrogenase activity in muscle after prolonged severe exercise in man. *Karlsson, J., B. Diamant, and B. Saltin* ... 88

NEUROPHYSIOLOGY

Diaphragm and abdominal muscle activity during induced hypotension. *Bishop, B.* ... 73
Test box and restraining harness for small animal behavioral studies. *Spector, N. H.* ... 101

HEMATOLOGY

Splenic contributions to pulmonary diffusing capacity in dogs and man. *Brashear, R. E., and J. C. Ross* ... 48

MUSCLE PHYSIOLOGY

Effect of temperature, exercise, and physical fitness on the triceps surae reflex. *Petajan, J. H., and C. J. Eagan* ... 16

OTHER ASPECTS OF PHYSIOLOGY

An electrical device to detect physical activity. *Peterson, A. E.* ... 103
Test box and restraining harness for small animal behavioral studies. *Spector, N. H.* ... 101

SPECIAL COMMUNICATIONS

In vitro carbohydrate metabolism in the rat after chronic exposure to hypoxia. *Davidson, M. B.* ... 105
A device for obtaining multiple brief timed synchronous samples of blood. *El-Ramli, H. A., B. Pullen, R. A. L. Brewis, and J. B. L. Howell* ... 98
Prediction of body density from skin-fold and girth measurements of college females. *Katch, F. I., and E. D. Michael, Jr.* ... 92
An electrical device to detect physical activity. *Peterson, A. E.* ... 103
Test box and restraining harness for small animal behavioral studies. *Spector, N. H.* ... 101
Time to achieve steady-state luminal glucose concentration during intestinal lavage. *Zatzman, M. L., and J. D. Moore* ... 95

No. 2. AUGUST 1968

CIRCULATION

Effect of atelectasis on lung changes after pulmonary arterial ligation. *Edmunds, L. H., Jr., and J. C. Holm* ... 115

Maximal oxygen uptake of the Easter Island population. *Ekblom, B., and E. Gjessing* ... 124
Circadian variation in human peripheral blood flow levels and exercise responses. *Kaneko, M., F. W. Zechman, and R. E. Smith* ... 109
A graphic method for the study of alternation in cardiac action potentials. *Nolasco, J. B., and R. W. Dahlen* ... 191
Influence of lower body negative pressure on peripheral venous ADH levels in man. *Rogge, J. D., and W. W. Moore* ... 134

RESPIRATION

Airway closure demonstration by breathing 100% O_2 at low lung volumes and by N_2 washout. *Burger, E. J., Jr., and P. T. Macklem* ... 139
Differential lung diffusion, capillary volume, and compliance in dogs. *Cree, E. M., J. R. Benfield, and H. K. Rasmussen* ... 186
Effect of atelectasis on lung changes after pulmonary arterial ligation. *Edmunds, L. H., Jr., and J. C. Holm* ... 115
Ether anesthesia, hypothermia, and carbohydrate metabolism in adult guinea pigs. *Hegab, E.-S. H. H., and J. A. Miller, Jr.* ... 130
Rapid decompression of chimpanzees to a near vacuum. *Koestler, A. G., and H. H. Reynolds* ... 153
Factors determining maximum expiratory flow in dogs. *Macklem, P. T., and J. Mead* ... 159
A fast-response oxygen analyzer with high accuracy for respiratory gas measurement. *Sodal, I. E., R. R. Bowman, and G. F. Filley* ... 181
A simple method for calibration of gas meters. *Strømme, S. B., and H. T. Hammel* ... 184

RENAL AND ELECTROLYTE PHYSIOLOGY

Influence of lower body negative pressure on peripheral venous ADH levels in man. *Rogge, J. D., and W. W. Moore* ... 134

GASTROINTESTINAL PHYSIOLOGY

A new cannula for the study of pancreatic function. *Herrera, F., D. R. Kemp, M. Tsukamoto, E. R. Woodward, and L. R. Dragstedt* ... 207

ENDOCRINOLOGY AND METABOLISM

Influence of lower body negative pressure on peripheral venous ADH levels in man. *Rogge, J. D., and W. W. Moore* ... 134
A simple method for calibration of gas meters. *Strømme, S. B., and H. T. Hammel* ... 184

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Double high-pressure chamber for chronic exposure of small animals. *Akers, T. K., R. E. Thompson, H. Dowell, Jr., and D. G. Barbee* ... 197
Airway closure: demonstration by breathing 100% O_2 at low lung volumes and by N_2 washout. *Burger, E. J., Jr., and P. T. Macklem* ... 139
Rhythm of the rectal temperature during a 6-month free-running experiment. *Colin, J., J. Timbal, C. Boutelier, Y. Houdas, and M. Siffre* ... 170
Maximal oxygen uptake of the Easter Island population. *Ekblom, B., and E. Gjessing* ... 124
Circadian variation in human peripheral blood flow levels and exercise responses. *Kaneko, M., F. W. Zechman, and R. E. Smith* ... 109
Rapid decompression of chimpanzees to a near vacuum. *Koestler, A. G., and H. H. Reynolds* ... 153
Relationship of evaporative rates to serum [Na^+], [K^+], and osmolarity in acute heat stress. *Senay, L. C., Jr.* ... 149
Strength of forearm flexors and extensors in men and women. *Singh, M., and P. V. Karpovich* ... 177
A simple method for calibration of gas meters. *Strømme, S. B., and H. T. Hammel* ... 184

COMPARATIVE AND GENERAL PHYSIOLOGY

Rhythm of the rectal temperature during a 6-month free-running experiment. *Colin, J., J. Timbal, C. Boutelier, Y. Houdas, and M. Siffre* ... 170
Maximal oxygen uptake of the Easter Island population. *Ekblom, B., and E. Gjessing* ... 124
Rapid decompression of chimpanzees to a near vacuum. *Koestler, A. G., and H. H. Reynolds* ... 153

NEUROPHYSIOLOGY

Location of maxima and minima in sensation patterns influenced by lateral inhibition. *Von Békésy, G.* ... 200

OTHER ASPECTS OF PHYSIOLOGY

Ether anesthesia, hypothermia, and carbohydrate metabolism in adult guinea pigs. *Hegab, E.-S. H. H., and J. A. Miller, Jr.* ... 130
A graphic method for the study of alternation in cardiac action potentials. *Nolasco, J. B., and R. W. Dahlen* ... 191

SPECIAL COMMUNICATIONS

Double high-pressure chamber for chronic exposure of small animals. *Akers, T. K., R. E. Thompson, H. Dowell, Jr., and D. G. Barbee* ... 197
Differential lung diffusion, capillary volume, and compliance in dogs. *Cree, E. M., J. R. Benfield, and H. K. Rasmussen* ... 186
A new cannula for the study of pancreatic function. *Herrera, F., D. R. Kemp, M. Tsukamoto, E. R. Woodward, and L. R. Dragstedt* ... 207
A graphic method for the study of alternation in cardiac action potentials. *Nolasco, J. B., and R. W. Dahlen* ... 191
A fast-response oxygen analyzer with high accuracy for respiratory gas measurement. *Sodal, I. E., R. R. Bowman, and G. F. Filley* ... 181
A simple method for calibration of gas meters. *Strømme, S. B., and H. T. Hammel* ... 184
Location of maxima and minima in sensation patterns influenced by lateral inhibition. *Von Békésy, G.* ... 200

No. 3. SEPTEMBER 1968

CIRCULATION

Unsteady-state measurement of oxygen transfer during treadmill exercise. *Auchincloss, J. H., Jr., R. Gilbert, and G. H. Baule* ... 283
Comparison of anoxia with and without ebullism. *Bancroft, R. W., J. P. Cooke, and S. M. Cain* ... 230
Continuous potassium-balance analysis in dog heart. *Gerlings, E. D., and J. P. Gilmore* ... 316
Cardiovascular responses to holding and carrying weights by hand and by shoulder harness. *Lind, A. R., and G. W. McNicol* ... 261
Cardiovascular changes during syncope induced by tilting men in the heat. *Lind, A. R., C. S. Leithead, and G. W. McNicol* ... 268
An intrapericardial ventricular mural tension gauge. *MacCanon, D. M., D. W. Bruce, J. Balfus, and B. J. Argano* ... 322

Regional pulmonary blood flow and gas exchange in hemorrhagic shock. *Naimark, A., A. Dugard, and R. E. Rangno* ... 301
Accurate calibration of gas meters with a single standard. *Nelson, N. M.* ... 326
Respiratory insensitivity to acute hypoxia persisting after correction of tetralogy of Fallot. *Sørensen, S. C., and J. W. Severinghaus* ... 221

RESPIRATION

Problems associated with the determination of carbon dioxide by infrared absorption. *Ammann, E. C. B., and R. D. Galvin* ... 333
Unsteady-state measurement of oxygen transfer during treadmill exercise. *Auchincloss, J. H., Jr., R. Gilbert, and G. H. Baule* ... 283
Comparison of anoxia with and without ebullism. *Bancroft, R. W., J. P. Cooke, and S. M. Cain* ... 230
In vivo oxygen dissociation curves for maternal and fetal rhesus monkeys. *Behrman, R. E.* ... 224
Relative hysteresis of the dead space and lung in vivo. *Froeb, H. F., and J. Mead* ... 244
Regional pulmonary blood flow and gas exchange in hemorrhagic shock. *Naimark, A., A. Dugard, and R. E. Rangno* ... 301
Accurate calibration of gas meters with a single standard. *Nelson, N. M.* ... 326
Exercise ventilatory patterns in normal subjects and patients with airway obstruction. *Pierce, A. K., D. Luterman, J. Loudermilk, G. Blomqvist, and R. L. Johnson, Jr.* ... 249
Changes in vagal neurogram with spontaneous deep breath in anesthetized cats. *Reynolds, L. B., Jr., and M. H. Flom* ... 238
Use of a modified Thunberg barospirator to determine airway resistance in man. *Schwaber, J. R., and J. Mead* ... 328
An anesthetic unit for small laboratory animals. *Simmons, M. L., and L. H. Smith* ... 324
Respiratory sensitivity to acute hypoxia in man born at sea level living at high altitude. *Sørenson, S. C., and J. W. Severinghaus* ... 211
Irreversible respiratory insensitivity to acute hypoxia in man born at high altitude. *Sørensen, S. C., and J. W. Severinghaus* ... 217
Respiratory insensitivity to acute hypoxia persisting after correction of tetralogy of Fallot. *Sørensen, S. C., and J. W. Severinghaus* ... 221

RENAL AND ELECTROLYTE PHYSIOLOGY

Continuous potassium-balance analysis in dog heart. *Gerlings, E. D., and J. P. Gilmore* ... 316
Continuous determination of the clearance of ^{131}I-diatrizoate, an inulin substitute. *Schmid, H. E., C. A. Muehlbaecher, and P. M. Hutchins* ... 294

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Problems associated with the determination of carbon dioxide by infrared absorption. *Ammann, E. C. B., and R. D. Galvin* ... 333
Unsteady-state measurement of oxygen transfer during treadmill exercise. *Auchincloss, J. H., Jr., R. Gilbert, and G. H. Baule* ... 283
Comparison of anoxia with and without ebullism. *Bancroft, R. W., J. P. Cooke, and S. M. Cain* ... 230
Relevant phase conditions for predicting occurrence of decompression sickness. *Hills, B. A.* ... 310
Cardiovascular responses to holding and carrying weights by hand and by shoulder harness. *Lind, A. R., and G. W. McNicol* ... 261
Cardiovascular changes during syncope induced by tilting men in the heat. *Lind, A. R., C. S. Leithead, and G. W. McNicol* ... 268
Mechanism of enhancement of eccrine sweating by localized heating. *MacIntyre, B. A., R. W. Bullard, M. Banerjee, and R. Elizondo* ... 255
Cold acclimation in Puerto Ricans. *Newman, R. W.* ... 277
Irreversible respiratory insensitivity to acute hypoxia in man born at high altitude. *Sørensen, S. C., and J. W. Severinghaus* ... 217
Respiratory sensitivity to acute hypoxia in man born at sea level living at high altitude. *Sørensen, S. C., and J. W. Severinghaus* ... 211

COMPARATIVE AND GENERAL PHYSIOLOGY

In vivo oxygen dissociation curves for maternal and fetal rhesus monkeys. *Behrman, R. E.* ... 224
An anesthetic unit for small laboratory animals. *Simmons, M. L., and L. H. Smith* ... 324

NEUROPHYSIOLOGY

Accurate freehand injection into the lateral brain ventricle of the conscious mouse. *Clark, W. G., C. A. Vivonia, and C. F. Baxter* ... 319
Changes in vagal neurogram with spontaneous deep breath in anesthetized cats. *Reynolds, L. B., Jr., and M. H. Flom* ... 238

HEMATOLOGY

In vivo oxygen dissociation curves for maternal and fetal rhesus monkeys. *Behrman, R. E.* ... 224

MUSCLE PHYSIOLOGY

Cardiovascular responses to holding and carrying weights by hand and by shoulder harness. *Lind, A. R., and G. W. McNicol* ... 261

SPECIAL COMMUNICATIONS

Problems associated with the determination of carbon dioxide by infrared absorption. *Ammann, E. C. B., and R. D. Galvin* ... 333
Accurate freehand injection into the lateral brain ventricle of the conscious mouse. *Clark, W. G., C. A. Vivonia, and C. F. Baxter* ... 319
Continuous potassium-balance analysis in dog heart. *Gerlings, E. D., and J. P. Gilmore* ... 316
An intrapericardial ventricular mural tension gauge. *MacCanon, D. M., D. W. Bruce, J. Balfus, and B. J. Argano* ... 322
Accurate calibration of gas meters with a single standard. *Nelson, N. M.* ... 326
Use of a modified Thunberg barospirator to determine airway resistance in man. *Schwaber, J. R., and J. Mead* ... 328
An anesthetic unit for small laboratory animals. *Simmons, M. L., and L. H. Smith* ... 324

No. 4. OCTOBER 1968

CIRCULATION

Transients in ventilation at start and end of exercise. *Beaver, W. L., and K. Wasserman* ... 390

Plasma renin activity during supine exercise in offspring of hypertensive parents. *Fasola, A. F., B. L. Martz, and O. M. Helmer* ... 410
Comparison of cardiac output determined by CO_2 rebreathing and dye-dilution methods. *Ferguson, R. J., J. A. Faulkner, S. Julius, and J. Conway* ... 450
Dynamic testing of electromagnetic flowmeters by mechanical and electronic methods. *Hainsworth, R., J. R. Ledsome, and H. M. Snow* ... 469
Effect of adrenergic blockade on the metabolic response to hemorrhagic shock. *Halmagyi, D. F. J., M. H. Irving, and D. Varga* ... 384
Effects of hypercapnia on the cardiovascular system of conscious dogs. *Horwitz, L. D., V. S. Bishop, and H. L. Stone* ... 346
Heart sounds of the right heart. *Luisada, A. A., D. M. MacCanon, D. W. Bruce, M. Worthen, B. Argano, W. Siwadlowski, and H. Kurz* ... 362
Hypoxic constriction of pulmonary artery and vein in intact dogs. *Morgan, B. C., S. C. Church, and W. G. Guntheroth* ... 356
Maximal oxygen uptake and cardiac output after 2 weeks at 4,300 m. *Saltin, B., R. F. Grover, C. G. Blomqvist, L. H. Hartley, and R. L. Johnson, Jr.* ... 400
A catheterization technique for His bundle stimulation and recording in the intact dog. *Scherlag, B. J., R. H. Helfant, and A. N. Damato* ... 425
In vivo calibration of electromagnetic flowmeter probes on pulmonary artery and aorta. *Weber, K. C., J. C. Engle, G. W. Lyons, A. J. Madsen, and I. J. Fox* ... 455

RESPIRATION

Transients in ventilation at start and end of exercise. *Beaver, W. L., and K. Wasserman* ... 390
A new design for an impedance pneumograph. *Cooley, W. L., and R. L. Longini* ... 429
Comparison of cardiac output determined by CO_2 rebreathing and dye-dilution methods. *Ferguson, R. J., J. A. Faulkner, S. Julius, and J. Conway* ... 450
A sampled-data regulator for maintaining a constant alveolar CO_2. *Holloman, G. H., Jr., H. T. Milhorn, Jr., and T. G. Coleman* ... 463
Surface activity of lung washings: is surface-active material adsorbed on cells? *King, R. J.* ... 337
Hypoxic constriction of pulmonary artery and vein in intact dogs. *Morgan, B. C., S. C. Church, and W. G. Guntheroth* ... 356
Airway resistance and uneven ventilation in bronchial asthma. *McFadden, E. R., Jr., and H. A. Lyons* ... 365
Use of the oxygen electrode in recording P_{O_2} in avian blood. *Nightingale, T. E., R. A. Boster, and M. R. Fedde* ... 371
A digital computer technique to eliminate cardiac pulses from intrathoracic pressure waves. *Rabin, S., and F. J. Lewis* ... 433
Maximal oxygen uptake and cardiac output after 2 weeks at 4,300 m. *Saltin, B., R. F. Grover, C. G. Blomqvist, L. H. Hartley, and R. L. Johnson, Jr.* ... 400
Oxygen carbon dioxide, H^+ ion, and bronchial length-tension relationships. *Stephens, N. L., J. L. Meyers, and R. M. Cherniack* ... 376
Theory of measurement of respiratory response. *Yamamoto, W. S.* ... 439

RENAL AND ELECTROLYTE PHYSIOLOGY

Plasma renin activity during supine exercise in offspring of hypertensive parents. *Fasola, A. F., B. L. Martz, and O. M. Helmer* ... 410

ENDOCRINOLOGY AND METABOLISM

Effect of adrenergic blockade on the metabolic response to hemorrhagic shock. *Halmagyi, D. F. J., M. H. Irving, and D. Varga* ... 384
Predictability of lean body weight through anthropometric assessment in college men. *Wilmore, J. H., and A. R. Behnke* ... 349

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Transients in ventilation at start and end of exercise. *Beaver, W. L., and K. Wasserman* ... 390
Plasma renin activity during supine exercise in offspring of hypertensive parents. *Fasola, A. F., B. L. Martz, and O. M. Helmer* ... 410
Comparison of cardiac output determined by CO_2 rebreathing and dye-dilution methods. *Ferguson, R. J., J. A. Faulkner, S. Julius, and J. Conway* ... 450
Effects of hypercapnia on the cardiovascular system of conscious dogs. *Horwitz, L. D., V. S. Bishop, and H. L. Stone* ... 346
A constant-temperature water-bath calorimeter for measuring extremity heat loss. *Newman, R. W., and J. R. Breckenridge* ... 447
Maximal oxygen uptake and cardiac output after 2 weeks at 4,300 m. *Saltin, B., R. F. Grover, C. G. Blomqvist, L. H. Hartley, and R. L. Johnson, Jr.* ... 400
Predictability of lean body weight through anthropometric assessment in college men. *Wilmore, J. H., and A. R. Behnke* ... 349

COMPARATIVE AND GENERAL PHYSIOLOGY

Techniques for telemetry of chimpanzee sheep electroencephalogram. *Kripke, D. F., and J. Bert* ... 461
A catheterization technique for His bundle stimulation and recording in the intact dog. *Scherlag, B. J., R. H. Helfant, and A. N. Damato* ... 425

NEUROPHYSIOLOGY

Techniques for telemetry of chimpanzee sleep electroencephalogram. *Kripke, D. F., and J. Bert* ... 461
Airway resistance and uneven ventilation in bronchial asthma. *McFadden, E. R., Jr., and H. A. Lyons* ... 365

HEMATOLOGY

C'1 activation in hereditary angioneurotic edema plasma: role of urokinase and inhibitors. *Donaldson, V. H.* ... 416
Use of the oxygen electrode in recording P_{O_2} in avian blood. *Nightingale, T. E., R. A. Boster, and M. R. Fedde* ... 371

MUSCLE PHYSIOLOGY

Oxygen, carbon dioxide, H^+ ion, and bronchial length-tension relationships. *Stephens, N. L., J. L. Meyers, and R. M. Cherniack* ... 376

OTHER ASPECTS OF PHYSIOLOGY

No. 5. NOVEMBER 1968

CIRCULATION

Effects of anesthesia and artificial ventilation on caval flow and cardiac output. *Abel, F. L., and J. A. Waldhausen* 479
Circulatory responses to arm exercise with different arm positions. *Åstrand, I., A. Guharay, and J. Wahren* 528
A calibration device for the earpiece dichromatic densitometer. *Barr, J. W., and E. C. Bradley* 633
Effect of seasonal training on maximal cardiac output. *Douglas, F. G. V., and M. R. Becklake* 600
Technique for placement of catheters in the common left coronary artery. *Eckstein, R. W., H. E. Rowen, Jr., and K. Shimomura* 636
Cardiac output in athletes. *Ekblom, B., and L. Hermansen* .. 619
Circulatory adaptation to one- and two-leg exercise in supine position. *Freyschuss, U., and T. Strandell* 511
Hemodynamic characteristics and blood gas exchange in the normal baboon. *Guenter, C. A., D. R. McCaffree, L. J. Davis, and V. S. Smith* 507
Vasoconstrictor response to simulated diving in man. *Heistad, D. D., F. M. Abboud, and J. W. Eckstein* 542
Hypoxic pulmonary vasoconstriction: role of perivascular tissue. *Lloyd, T. C., Jr.* 560
Circulatory effects of blood viscosity: comparison of methemoglobinemia and anemia. *Murray, J. F., and E. Escobar* 594
Impact pressure, lateral pressure, and impedance in the proximal aorta and pulmonary artery. *O'Rourke, M. F.* 533
Permanent cannulation of blood vessels in mice. *Popovic, P., H. Sybers, and V. P. Popovic* 626
pH and blood viscosity. *Rand, P. W., W. H. Austin, E. Lacombe, and N. Barker* 550
Circulation and recirculation of injected dye in the anesthetized dog. *Sheppard, C. W., B. M. Uffer, P. C. Merker, and G. Halikas* 610
A simple technique for the production of chronic complete heart block in dogs. *Steiner, C., and A. T. W. Kovalik* .. 631
Regional pulmonary arterial-venous shunting caused by gravitational and inertial forces. *Vandenberg, R. A., A. C. Nolan, J. H. Reed, Jr., and E. H. Wood* 516
Oxygen and carbon dioxide tensions in tissue and blood of normal and acidotic rats. *Van Liew, H. D.* 575
Changes in central circulation and body fluid spaces during acclimatization to heat. *Wyndham, C. H., A. J. A. Benade, C. G. Williams, N. B. Strydom, A. Goldin, and A. J. A. Heyns* 586

RESPIRATION

Effects of anesthesia and artificial ventilation on caval flow and cardiac output. *Abel, F. L., and J. A. Waldhausen* 479
Cardiac output in athletes. *Ekblom, B., and L. Hermansen* .. 619
Hemodynamic characteristics and blood gas exchange in the normal baboon. *Guenter, C. A., D. R. McCaffree, L. J. Davis, and V. S. Smith* 507
Maximum expiratory flow in isolated liquid-filled lungs. *Hamosh, P., and P. C. Luchsinger* 485
Human platelet respiration. *Kitchens, C. S., and T. F. Newcomb* 581
Hypoxic pulmonary vasoconstriction: role of perivascular tissue. *Lloyd, T. C., Jr.* 560
Stimulation of aortic and carotid chemoreceptors during carbon monoxide inhalation. *Mills, E., and M. W. Edwards, Jr.* 494
Circulatory effects of blood viscosity: comparison of methemoglobinemia and anemia. *Murray, J. F., and E. Escobar* 594
Pulmonary tissue and surface elastic forces at low lung volumes in rabbits. *Stemmler, E. J., and A. B. DuBois* .. 473
Previous volume history of the lung and regional distribution of gas. *Sutherland, P. W., T. Katsura, and J. Milic-Emili* .. 566
Regional pulmonary arterial-venous shunting caused by gravitational and inertial forces. *Vandenberg, R. A., A. C. Nolan, J. H. Reed, Jr., and E. H. Wood* 516
Oxygen and carbon dioxide tensions in tissue and blood of normal and acidotic rats. *Van Liew, H. D.* 575

GASTROINTESTINAL PHYSIOLOGY

Concurrent collection of bile and pancreatic juice through Thomas cannula. *Wyman, J. B., K. G. Wakim, L. G. Bartholomew, and J. C. Cain* 638

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

Circulatory responses to arm exercise with different arm positions. *Åstrand, I., A. Guharay, and J. Wahren* 528
Effect of seasonal training on maximal cardiac output. *Douglas, F. G. V., and M. R. Becklake* 600
Circulatory adaptation to one- and two-leg exercise in supine position. *Freyschuss, U., and T. Strandell* 511
Changes in regional distribution of sweating during acclimatization to heat. *Höfler, W.* 503
Effects of altitude acclimatization on pulmonary function in women. *Shields, J. L., J. P. Shannon, C. W. Harris, and W. S. Platner* 606
Regional pulmonary arterial-venous shunting caused by gravitational and inertial forces. *Vandenberg, R. A., A. C. Nolan, J. H. Reed, Jr., and E. H. Wood* 516
Cooling required to suppress sweating during work. *Webb, P., and J. F. Annis* 489
Changes in central circulation and body fluid spaces during acclimatization to heat. *Wyndham, C. H., A. J. A. Benade, C. G. Williams, N. B. Strydom, A. Goldin, and A. J. A. Heyns* 586

COMPARATIVE AND GENERAL PHYSIOLOGY

Hemodynamic characteristics and blood gas exchange in the normal baboon. *Guenter, C. A., D. R. McCaffree, L. J. Davis, and V. S. Smith* ... 507
An instrumentation harness assembly for long-term use on miniature swine. *Karagianes, M. T.* ... 641

No. 6. DECEMBER 1968

CIRCULATION

A modified design of inflatable splint. *Ashton, H.* ... 765
High-G environment and responses to graded exercise. *Bjurstedt, H., G. Rosenhamer, and O. Wigertz* ... 713
Discrepancy in measuring blood in couette, cone and plate, and capillary tube viscometers. *Charm, S. E., and G. S. Kurland* ... 786
A method for recording baby rat systolic blood pressures. *Dowd, D. A., and D. R. Jones* ... 772
Normal distribution of cardiac output in the unanesthetized, restrained rhesus monkey. *Forsyth, R. P., A. S. Nies, F. Wyler, J. Neutze, and K. L. Melmon* ... 736
Viscometry of circulating blood in dogs— I: heparin injection; II: platelet removal. *Frasher, W. G., H. Wayland, and H. J. Meiselman* ... 751
An improved hydraulic vascular occluder for chronic electromagnetic blood flow measurements. *Henry, W. L., C. Ploeg, S. L. Kountz, and D. C. Harrison* ... 790
Effect of extra-alveolar vessels on distribution of blood flow in the dog lung. *Hughes, J. M. B., J. B. Glazier, J. E. Maloney, and J. B. West* ... 701
Measurement of the distribution of cardiac output. *Kaihara, S., P. D. Van Heerden, T. Migita, and H. N. Wagner, Jr.* .. 696
A device facilitating in situ freezing of rat heart with modified Wollenberger tongs. *Leunissen, R. L. A., and D. A. Platnek-Leunissen* ... 769
Effect of muscular contraction on cholesterol oxidation. *Malinow, M. R., P. A. McLaughlin, and A. M. Perley* ... 733
Altered myocardial performance in response to anoxia after high-altitude exposure. *McGrath, J. J., and R. W. Bullard* ... 761
Continuous analog computer analysis of ventricular performance. *Nutter, D. O., and J. D. Capehart* ... 775
Cardiorespiratory changes in college women due to a season of competitive basketball. *Sinning, W. E., and M. J. Adrian* ... 720
Indirect measurement of arterial blood pressure by Doppler ultrasonic sphygmomanometry. *Stegall, H. F., M. B. Kardon, and W. T. Kemmerer* ... 793
Experimental hypoxic pulmonary edema in the rat. *Whayne, T. F., Jr., and J. W. Severinghaus* ... 729

RESPIRATION

High-G environment and responses to graded exercise. *Bjurstedt, H., G. Rosenhamer, and O. Wigertz* ... 713
Mechanical properties of alveolar walls. *Fukaya, H., C. J. Martin, A. C. Young, and S. Katsura* ... 689
Effect of extra-alveolar vessels on distribution of blood flow in the dog lung. *Hughes, J. M. B., J. B. Glazier, J. E. Maloney, and J. B. West* ... 701
Purification of pulmonary surfactant by ultracentrifugation. *Klein, R. M., and S. Margolis* ... 654
Effect of muscular contraction on cholesterol oxidation. *Malinow, M. R., P. A. McLaughlin, and A. M. Perley* ... 733
Cardiorespiratory changes in college women due to a season of competitive basketball. *Sinning, W. E., and M. J. Adrian* ... 720
Role of connective tissues in large pulmonary airways. *Turino, G. M., R. V. Lourenço, and G. H. McCracken* ... 645
Elasticity of human lungs in relation to age. *Turner, J. M., J. Mead, and M. E. Wohl* ... 664
Experimental hypoxic pulmonary edema in the rat. *Whayne, T. F., Jr., and J. W. Severinghaus* ... 729

RENAL AND ELECTROLYTE PHYSIOLOGY

An improved hydraulic vascular occluder for chronic electromagnetic blood flow measurements. *Henry, W. L., C. Ploeg, S. L. Kountz, and D. C. Harrison* ... 790

ENDOCRINOLOGY AND METABOLISM

A device facilitating in situ freezing of rat heart with modified Wollenberger tongs. *Leunissen, R. L. A., and D. A. Platnek-Leunissen* ... 769

ENVIRONMENTAL PHYSIOLOGY AND EXERCISE

High-G environment and responses to graded exercise. *Bjurstedt, H., G. Rosenhamer, and O. Wigertz* ... 713

Heat-induced hyperventilation. *Gaudio, R., Jr., and N. Abramson* ... 742
Altered myocardial performance in response to anoxia after high-altitude exposure. *McGrath, J. J., and R. W. Bullard* ... 761
Organ lactic dehydrogenase in altitude-acclimatized rats. *Miller, A. T., Jr., and D. M. Hale* ... 725
Immediate viscosity of synovial fluid. *Palfrey, A. J., and D. V. Davies* ... 672
Muscle temperature during submaximal exercise in man. *Saltin, B., A. P. Gagge, and J. A. J. Stolwijk* ... 679
Cardiorespiratory changes in college women due to a season of competitive basketball. *Sinning, W. E., and M. J. Adrian* ... 720
Experimental hypoxic pulmonary edema in the rat. *Whayne, T. F., Jr., and J. W. Severinghaus* ... 729

COMPARATIVE AND GENERAL PHYSIOLOGY

Prediction of body density from skin-fold and girth measurements of 17-year-old boys. *Michael, E. D., Jr., and F. I. Katch* ... 747
Immediate viscosity of synovial fluid. *Palfrey, A. J., and D. V. Davies* ... 672
Role of connective tissues in large pulmonary airways. *Turino, G. M., R. V. Lourenço, and G. H. McCracken* ... 645

NEUROPHYSIOLOGY

Muscle activity and kinesthetic position responses. *Lloyd, A. J.* ... 659

MUSCLE PHYSIOLOGY

Comparison of elasticity of an artery in vivo and in excision. *Lee, J. S., W. G. Frasher, and Y. C. Fung* ... 799
A device facilitating in situ freezing of rat heart with modified Wollenberger tongs. *Leunissen, R. L. A., and D. A. Platnek-Leunissen* ... 769
Muscle activity and kinesthetic position responses. *Lloyd, A. J.* ... 659
Altered myocardial performance in response to anoxia after high-altitude exposure. *McGrath, J. J., and R. W. Bullard* ... 761
Muscle temperature during submaximal exercise in man. *Saltin, B., A. P. Gagge, and J. A. J. Stolwijk* ... 679

CORRIGENDA

Volume 24, March 1968

Page 369: J. W. Austin, R. B. Leidy, G. M. Krise, and E. W. Hupp. "Normal values for semen collected from Spanish goats by two methods." Page 369, footnote 1 should read, "This investigation was supported in part by Grant RH00330, National Center for Radiological Health, Public Health Service."

Volume 24, June 1968

Page 751: R. M. Gesinski, J. H. Morrison, and J. R. Toepfer. "Measurement of oxygen consumption of rat bone marrow cells by a polarographic method." An incorrect value for the Bunsen coefficient was used in calculating oxygen consumption. All values given for microliters of oxygen consumed—in the text, figures, and all tables—should be corrected by dividing by a factor of 4.77. This correction does not alter the interpretations made in the paper but only the magnitude of the consumption reported.
